GENERAL

Proceedings of the Government of His Highness the Maharaja of Mysore,

READ—

Letter No. 3379—570, dated 12th February 1903, from the Deputy Commissioner, Kolar District, reporting about the retirement of one Narasappa, a revenue gumasta of the Goribidnur Taluk.

No. 14782-821—P. & A. 1370, DATED BANGALORE, 13TH APRIL 1903.

ORDER THEREON.—Narasappa is reported to have been retired from service on his representation that he had rendered 30 years' qualifying service to entitle him to a retiring pension; but on his pension application being forwarded to the Comptroller for verification, it was found that there was a deficiency of one year, ten months and six days in his qualifying service to make up 30 years to entitle him to a retiring pension. He was consequently sent to the District Surgeon for a medical certificate to entitle him to an invalid pension. The District Surgeon certifies that Narasappa is fit for further service while the Sub-Division Officer reports that he is quite unfit for any work whatever. In these circumstances the Deputy Commissioner requests that the deficiency of one year, ten months and six days may be condoned so as to entitle Narasappa to a retiring pension.

2. It is observed that as Narasappa had not rendered 30 years' service, no retiring pension was admissible. He was not 55 years old and therefore a superannuation pension could not be granted. There was no interruption in his service and no condonation is consequently possible. No invalid pension could be granted since the gumasta has not been pronounced unfit for further duty by the Medical Officer. The Sub-Division Officer was not right in overruling the Medical Officer's opinion on his own responsibility, and relieving the official of his duties.

3. Government are therefore pleased to direct that the revenue gumasta in question be restored to his appointment at once and dealt with in accordance with the Mysore Service Regulations, a separate reference being made to Government in regard to his pay for the period during which he has been kept out of employ.

READ AGAIN—

Notification No. 21572—G. F. 99-93, dated 10th June 1894, sanctioning certain revised rules regarding the constitution and conduct of business of the Mysore Representative Assembly, in supersession of the Rules contained in Notification No. 76, dated 14th May 1891.

No. 14938-45—MIS. 2276, DATED BANGALORE, 15TH APRIL 1903.

ORDER THEREON.—The Government are pleased to direct that the term "Land Revenue," as used in clause (*a*) of Rule 1 and elsewhere of the Rules notified in Government Notification No. 21572—G. F. 99-93, dated 10th June 1894, shall be held to include Local and Irrigation Cesses. (Section 219, Mysore Land Revenue Code.)

H. V. NANJUNDAYYA,
Secy. to Govt., Gen. & Rev. Depts.

To—The Deputy Commissioners of Districts.

No. 15097-136—P. & A. 1396, DATED BANGALORE, 20th APRIL 1903.

ORDER.—Privilege leave preparatory to retirement is inadmissible under the existing provisions of the Mysore Service Regulations. In practice, however, this concession is being shown in nearly every case. Much unnecessary correspondence is caused by every such case having to be referred for the orders of Government. To obviate the necessity of such references, Government are pleased to direct that the existing rules be so altered as to bring them into line with the practice now in vogue, and that such privilege leave as an officer may be entitled to at the time of retirement, be granted to him preparatory to his retirement from the service.

2. The Comptroller is requested to submit for the approval of Government a draft addendum to the Mysore Service Regulations accordingly.

EDUCATION.

Proceedings of the Government of His Highness the Maharaja of Mysore,

READ—

Letter No. 7623-252, dated 3rd March 1903, from the Inspector General of Education in Mysore.

With reference to Government Order No. 8757-9—Ed. F. 22-96, dated Bangalore, 28th January 1898, and subsequent correspondence ending with my letter No. 4821—169, dated 8th December 1898, I have the honor to inform you that the experience of the last four years has confirmed my opinion stated in the last named letter that to secure efficiency the purely industrial departments should by themselves form the Industrial School at Mysore and the Engineering Classes of the school called in the budget "Masonry Class" be reorganised and formed into a separate Engineering School under a Head Master of its own. The Committee of the Mysore Industrial School also at their meeting held on the 10th February 1902, resolved that this separation should be effected if a proper Engineering School for the education of Sub-Overseers, Taluk Mestris and Tank Inspectors is required. Mr. A. Chatterton who has been deputed for the improvement of industrial education in the Madras Presidency has also formed the same opinion after inspecting the Mysore school. Under these circumstances I recommend that an Engineering School be opened in a portion of the building of the Mysore Industrial School under a separate Head Master on Rs. 200 and the Masonry Class of the Industrial School abolished. The best qualified person for the post of Head Master is Mr. O. V. Norris, B. C. E., A. C. E., who has recently retired from the rank of Assistant Engineer, First Grade, in the Public Works Department and who was a successful teacher of the Engineering College, Bangalore, which existed about 1880. Mr. Norris combines high educational qualifications with practical experience and is an enthusiastic teacher. To help Mr. Norris, two Assistants on Rs. 50 each will be required, of whom one may be appointed to teach levelling and surveying and other subjects at first, the appointment of the second Assistant being deferred to the second year or till such time as the need of his services is felt.

2. The classes, rates of fees to be charged in them, age of admission and previous educational qualifications will be as shown in the following statement:—

Class	Rate of monthly fee	Age at admission	Educational qualifications at time of admission
	Rs.		
Sub-Overseers and Surveyors ...	4	16 to 20 on 31st December preceding.	Candidates must have passed the Matriculation Examination or be qualified for admission to the VI Form.
Draughtsmen	3	Do	Do
Taluk Mestris	1	Do	Candidates must have passed the Lower Secondary Examination in English.
Tank Inspectors	1	Do	Do

The corresponding rates of fee in the Madras College of Engineering are Rs. 5, 4, 1 and 1. The Committee of the Industrial School agree with me in making the above recommendations.

3. The curricula of the four classess will have to be carefully prepared in conformity with the courses of instruction adopted in the College of Engineering.

4. The cost of the school will be roughly the following:—

	Rs.
Head Master	200
2 Assistants on Rs. 40 rising to 50 by five annual increments ..	80
2 Lascars on Rs. 6 each	12
2 Peons on Rs. 6 each	12
Contingencies	30
Total ..	334

5. The monthly fees for an estimated attendance of only 12 students in each class will be Rs. 48 plus 36 plus 12 plus 12 or Rs. 108, the net cost of the establishment being Rs. 226 a month. No scholarships need be given.

6. In the commencement although the apparatus and furniture now used for the Masonry Class will be transferred to the Engineering School, some outlay will be necessary for additional apparatus and furniture for higher teaching. The cost will be met from the provisions made in the Industrial School Budget of the current year.

7. I request that the cost of monthly establishment shown in para 5 may be sanctioned from Local Funds General and that Mr. Norris' appointment as Head Master on Rs. 200 may also be sanctioned.

8. In view of the fact that education in the Engineering School will be costly and for the encouragement of technical education, it would be well for Government to lay down that young men who pass out from the school should be given preference in filling up vacancies in the Public Works and Revenue Departments requiring technical knowledge.

No. 14694-6—Ed. F. 4-96, dated Bangalore, 7th April 1903.

Order thereon.—Government regret to observe that the various departments of the Mysore Industrial School have not of late been in a very satisfactory state, and that its maintenance involves an amount of expenditure disproportionate to the work turned out.

2. Under these circumstances, the Government consider that the efficiency of the institution will be best promoted by confining its scope to the purely industrial departments. The present Masonry Class however will be abolished and a separate Engineering School formed at Mysore for training up pupils as Sub-Overseers, Draughtsmen and Surveyors, Taluk Mestris, Tank and Work Inspectors.

3. The Engineering School will be located in a portion of the Industrial School building. Its staff will consist, as proposed by the Inspector General of Education, of a Head Master on Rs. 200 per mensem, and two Assistant Masters on Rs. 40 rising to Rs. 50 by five annual increments, to be appointed as occasion arises for their services. The cost of the school, which, as shown in the margin, amounts to Rs. 334 per mensem or Rs. 4,008 per annum, will be sanctioned as a grant from the Local Funds General.

		Rs.
Head Master	... ...	200
2 Assistants 40-2-50	... ...	80
2 Lascars at Rs. 6 each	... ...	12
2 Peons do	... ...	12
Contingencies	... ...	30
	Total ...	334

4. The classes, rates of fees, age of admission and previous educational qualifications of applicants for admission are approved as recommended by the Inspector General.

5. Government desire that, in filling up vacancies in the Public Works and Revenue Departments requiring technical knowledge, preference be given, as far as possible, to qualified students passed out of the new Engineering School.

6. The Superintendent of the Industrial School was also its Honorary Secretary till March 1902, when in accordance with Government Order No. 15485-6—Mis. 2211, dated 17th March 1902, Mr. Nagavkar became the Honorary Secretary and the Committee was also revised and strengthened. A detailed enquiry has been in progress with regard to the working of the school and it is expected that the Committee will be in a position to submit a comprehensive report by June next, which, it is hoped, will contain definite proposals for the improvement of the institution generally on sound business principles.

READ THE FOLLOWING PAPERS :—

(1) Letter No. 6381—208, dated 25th January 1902, from the Inspector General of Education in Mysore.

I have the honor to inform you that during my tour in last June I was much struck by the fact that the enterprising Head Master of the Anglo-Vernacular School at Hole-Narsipur in Hassan District had, by his own unaided efforts, made one or two fly-shuttle handlooms, and was not only making known to the weaver population of the town the uses and advantages of the fly-shuttle arrangement, but training a few weaver boys on the fly-shuttle looms in a part of the Branch Taluk School. At Dodballapur I visited many weavers' houses and found the fly-shuttle loom in use in only one house. At Chiknayakanhalli in Tumkur District, which is another centre of weaver population, I visited many weavers' houses but did not find the fly-shuttle loom in use there. I was convinced that the fly-shuttle arrangement would greatly increase the outturn of the loom and increase the earnings of the weavers if the Sowcars who finance or employ the weavers would deal fairly by them.

2. Shortly after my return from tour, Mr. E. B. Havell, Principal, Government School of Art, Calcutta, delivered a lecture on the Industrial Development of India, in which he advocated the introduction of the fly-shuttle into the Indian handloom with great enthusiasm. His lecture gave rise to much discussion and correspondence which lasted for several months in the newspapers. I have been in correspondence with Mr. Havell, with the Secretary of the Weavers' Guild at Sholapur, and with Messrs. Robert Hall & Sons of Bury. English handlooms with the fly-shuttle cost from 8 to 10£ without any extras and are much too costly for Indian weavers. The great thing that is necessary at present to be done is: (1) to make known to weavers the advantages of the use of the fly-shuttle; (2) to train young boys in weaving on the fly-shuttle looms, various kinds and patterns of cloth; and (3) to supply lays and attach them to the country looms in places in which there are hundreds and thousands of country looms at work, so as to convert them into fly-shuttle looms. A professional weaver will not require more than a month's practice to use with ease the fly-shuttle arrangement. A boy learning to weave different kinds of cloth as well as patterns may take two years to be a skilful weaver. I have provided in the estimate of the cost of a weaving school appended to this letter, scholarships of Rs. 2 and Rs. 3, the tenure of which will be longer or shorter according to circumstances. I have also provided small scholarships for boys learning merely carpentry and drawing. Only so many scholarhips will be availed of as may be necessary.

3. I consider it of great importance that a small carpentry class should be attached to each weaving school. From this class the country looms in the same town and surrounding villages will receive the 'lay' of the fly-shuttle and be repaired or adapted. It is difficult to get skilful carpenters in the centres of weaver population. As it is possible to add the subject of elementary drawing to the carpentry class without increasing the cost, I have added the subject. The teacher of drawing and carpentry may also teach Elementary drawing in the neighbouring Taluk School.

4. I recommend that three weaving schools may be started, as early as funds can be spared, in Hole-Narsipur, Dodballapur and Chiknayakanhalli. When these schools are successfully and economically worked at a small cost, some more of similar schools may be opened at other centers like Harihar, Davangere, Molakalmuru, Hosdurga, Mandya, Malvalli, Kikkeri, Hosaholalu and Melkote. I hope that the fly-shuttle loom may in course of time be adapted also to cumbli-weaving, by making the lay reed and shuttle larger than for silk and cotton weaving, and used in towns in which woollen cloths are woven. The weaver population of Mysore is 86,818 according to the Census of 1891.

5. It will be seen from the estimate of the cost of a weaving school that the initial expenses will be Rs. 785, the annual establishment charges will be Rs. 2,016 and the cost of materials per year Rs. 2,200 or roughly, the total cost will be Rs. 5,000. Leaving out the initial cost, I have no doubt that the whole cost of the materials and more than half the cost of establishment will be recovered from the sale of the cloths produced and of the looms and lays and other wooden articles manufactured in the school. The net cost of each school, if it is managed with economy and intelligence, need not exceed Rs. 1,200 or 1,500 a year.

6. I recommend that the cost of these schools may be borne by Local Funds General, as in the case of the Mysore Industrial School. The schools may be sanctioned temporarily for two or three years and the service of the employes need not be made pensionable. If, as I anticipate, the schools are worked at a cost of about Rs. 1,200 a year, the Superintendent may be called Manager and he may be allowed a grant of Rs. 100 a month, and the schools may be considered to be Aided Schools like the Hassan Industrial School, in future.

7. I would add that the mere opening of these weaving schools and the introduction of fly-shuttle looms will not materially improve the condition of the weaver community, so long as they have to be the serfs, so to speak, of Sowcars, from whom they receive the yarn they require and to whom they sell the cloths they weave. The Sowcar drives a hard bargain, both in selling yarn and buying cloths, and unless the weaver is saved from the grip of the Sowcar, the benefit of using the fly-shuttle loom will accrue more to the Sowcar, than to the weaver, who may be left in almost the same state of indigence as now by the Sowcar, in spite of his use of the fly-shuttle loom. The weaver has also to learn habits of thrift and temperance before he can greatly improve his condition. To effect both these objects I would recommend that in large centres of weaver population, revenue officers who have the good of the weaver community at heart, should be directed to encourage the formation and guide the working of Co-operative Societies with a capital of about Rs. 2,000 the value of each share being Rs. 2½. This amount of capital will be amply sufficient in a town like Hole-Narsipur, firstly to purchase a stock of yarn and make advances of yarn at very nearly the cost price to weavers, and secondly to re-purchase cloths at fair prices from weavers and after deducting the value of yarn to pay the balance as profit to the weaver. A Co-operative Society buying large stocks of yarn and selling the cloths in the best available markets is likely to make fair profits, besides helping large numbers of weavers to earn more wages for their labur. The details of management and the rights of the shareholders may be settled by some one having some practical knowledge of the working of similar societies. Unless such soceties are formed and worked in a businesslike manner, I do not anticipate much improvement in the lot of weavers.

I consider the lines on which the Industrial Schools are working as sound, though more life has to be infused into the various departments of the Mysore Industrial School, and a much larger quantity of work has to be turned out than at present, before the school can be considered quite successful. An Industrial or trade school should pay its own way except, perhaps School the cost of the permanent establishment. It is on this principle that some of the successful schools in the Madras Presidency carry on their work. They are more or less mere workshops carried on on business principles, and they have large receipts from the sale of the articles produced, which nearly cover the cost of their maintenance. The Madras School of Arts yields a large annual profit chiefly from the extensive sale of aluminium articles. The Madura School recovers from the sale of its manufactured articles the whole cost of maintenance except the salaries of teachers. It trains 152 pupils of whom 72 learn cabinet-making, 35 metal work, 25 blacksmiths' work, and 20 rattan work. All pupils learn drawing. Wood-carving is the speciality of the school. The school has a Superintendent on Rs. 200 and an Assistant Superintendent on Rs. 75. The Karur Wesleyan Mission School has 96 subject pupils of whom 55 learn carpentry, 6 blacksmithing, 8 rattan work, 6 weaving and 21 drawing. The carpentry workshop alone brings large profits which, with the salary, scholarship and apparatus, grants-in-aid enable the managers to engage the services of a European Superintendent whose emoluments amount to more than Rs. 300 a month. The point chiefly to be borne in mind appears to me to be to teach such trades and industries as can supply the present wants of the people, and to manage the schools as workshops on business principles. If an ideal or theoretical course of instruction is attempted, the cost of education will be excessively high, and the men so instructed will not be able to earn a living. In India especially there is little or no scope for the exercise of the fine arts of painting, sculpture, etc., but every town requires skilled artisans who are often difficult to procure.

To this principle I would add another, that wherever an industry has existed on a commercial basis, it should be taught and developed in schools so as to provide a means of living for a large number of people and adding to the wealth of the country.

There is another kind of technical instruction such as is given in Commercial and Engineering schools which train up commercial clerks, shorthand-writers, typists and Public Works Department subordinates such as Sub-Overseers, Surveyors, Taluk Mestries, and Tank Inspectors. These schools can, with the exception of a little help, become self-supporting from fees.

I would develop the Commercial Classes of Mr. Lakshminaranaiya at Bangalore into a fairly good Commercial School for Bangalore for teaching shorthand, typewriting, commercial correspondence, commercial geography and banking.

I have already submitted proposals for a School of Engineering to be established at Mysore.

I have also submitted proposals for the opening of weaving schools at Hole-Narsipur, Dodballapur and Chiknayakanhalli, and establishment of co-operative societies of weavers.

In connection with these weaving schools the art of dyeing yarn with German or native vegetable dyes also will require to be taught. A department for dyeing may be attached to the weaving schools after they have come into working order.

I believe that the fly-shuttle loom can be adapted to woollen weaving. Woollen mills driven by steam have power looms fitted with the fly-shuttle and the question has to be studied whether hand-looms for weaving woollen cloths cannot be fitted with the fly-shuttle. If the woollen hand-loom can be so fitted, it would be well to open weaving schools in centres of woollen industry like Mandya, Davangere, Hosdurga, etc.

At Channapatna the art of lacquer-work and manufacture of toys from a special kind of white-light and close, grained wood has been developed, as well as the manufacture of steel wires for vine and other string musical instruments. A school for teaching these local industries combined with classes for carpentry, blacksmiths' work and drawing may be established.

At Sagar in the Shimoga District the people have subscribed Rs. 1,500 for starting an industrial school and request Government to establish an industrial school. For many years it

has been difficult to get a local carpenter at Sagar, and the people are solely dependent on carpenters coming from the west coast for their work. I shall shortly submit proposals for the establishment of an industrial school at Sagar.

In my letter No. 10116-369, dated 12th June 1899, I submitted proposals for the establishment of industrial schools at the head-quarters of as many districts as possible. Bangalore hardly needs an industrial school of the ordinary type on account of the large Railway and private workshops that exist and serve to train artisans. In Kolar the Episcopal Mission Industrial School, which has been recently aided, will suffice. At Tumkur the Wesleyan Mission Industrial School requires to be further developed. At Chitaldrug an industrial school is said to have been started by the Headmaster of the High School. I have had no official knowledge of the existence or work of the school. The school may be placed on a satisfactory basis and either taken over by Government or aided. At Shimoga there is a fairly large carpentry shop with a Brahmin manager and Brahmin workmen in it. A grant-in-aid may be given to the manager for the purpose of giving scholarships to learners and for help in the maintenance of an efficient establishment. At Chikmagalur an industrial school is likely to flourish and do good work. At Hassan there is a small but well-managed industrial school in connection with the High School. Mr. Cress has managed the school with great ability and economy. Mysore possesses a good industrial school.

Wherever there are carpentry and blacksmiths' classes, I would insist on the manufacture among other articles of cheap country carts, improved ploughs and agricultural implements. A set of such ploughs and European and Japanese implements may be supplied as patterns to all industrial schools having these classes.

It struck Mr. J. N. Tata of Bombay in some of his visits to Bangalore and Mysore that the Mysore Province was specially adapted for the rearing of the silk-worm. In cold countries like France, Italy or Japan worms can be bred only in the spring or summer, but in the temperate climate of Mysore they could be bred all the year round, and six generations of worms can be bred in a year. The silk industry in Mysore is said to have been first commenced in the time of Tippu Sultan, and a French firm carried it on on a large scale in Kengeri at one time, but those were times when whole crops of silk-worms used to be decimated by the prevalence of an infectious fever. The destruction of successive crops was fatal to the industry and even at the present time those who rear silk-worms in the districts of Bangalore, Kolar and Mysore, are often disappointed and ruined by the prevalence of febrin among the worms. Pasteur who by his researches has saved the silk industry of France and Italy, has shown an easy way of detecting diseased eggs by means of the microscope. If diseased eggs are detected and destroyed the rest of the seeds are saved and the rearer saved from much loss. Mr. Tata, solely with a view to improve the silk industry of Mysore and confer a lasting benefit on the population, has established an experimental silk farm in Bangalore and has imported a Japanese expert and a Japanese manager to work the farm. The cultivation of various species of local and foreign mulberry trees has been scientifically carried on, eggs from France, Italy and Japan have been imported to breed from, cross breeds between the local and foreign moths have been produced, the local species of worms has been greatly improved, and lastly the silk produced from worms scientifically reared on Japanese methods has been reeled on Japanese reeling machinery. Some of these experiments, especially the rearing of cross-bred worms in successive generations, have proved a failure, and unfortunately there is little or no demand for the improved quality of silk produced by improved methods. Mr. Tata has, I believe, spent more than Rs. 25,000 on the farm with hardly any return up to date.

I would propose that Government should take advantage of the existence of the farm, and train up a number of village school masters in improved methods of (1) growing mulberry trees; (2) rearing the silk-worm and (3) reeling. There are a number of villages in the Districts of Bangalore, Kolar and Mysore where silk-rearing is followed as a trade by the rural population. I would bring five village school teachers from such villages at a time to Mr. Tata's farm for a period of three months, and train them under Mr. Tata's Japanese expert in the above improved methods. They may be given monthly scholarships of Rs. 7 each. At the farm they would get the scholarship plus a portion of their pay, the two together being equal to their pay, while in their absence substitutes on Rs. 7 would carry on their school work. Thus every year about twenty village masters would learn the improved methods and especially the art of detecting and destroying diseased eggs and saving a whole crop from utter destruction, which is at present the bane of the industry. I would make a complete list of villages in which silk industry flourishes, and if necessary more than five scholarships may be given at a time. When a school master returns to his school, he should be given a microscope, or the power of borrowing one from the Taluk Cutcherry which should have a supply of microscopes according to the needs of the taluk. He should go about with the microscope from house to house and examine the latest crop of seeds, and reject and destroy the diseased seeds. At the same time he should tell the raiyats how to improve the cultivation of the mulberry tree, the rearing of the worm, and lastly the reeling of the silk.

In Japan special inspectors are appointed for this work by Government, who go about with the microscope helping and advising the silk rearers. The school masters may be given an allowance of Rs. 5 a month by the Revenue Department and a quarterly report of the

work done by them may be demanded from them by the Amildar, who should also see for himself the work done by the school masters during his tours. The work done by the school masters for the silk industry should of course be done out of school hours and without prejudice to their proper duties. If the scheme works well, Government may in course of time consider the advisability of paying half the emoluments of the Japanese expert who will train the teachers. Thus at a small cost to Government it will be possible to help and develop what is now a struggling industry but may become a highly remunerative industry in the near future.

I would proceed on the above lines to improve and spread industrial education in the Province. It will be seen that I attempt no ambitious plan, nor do I provide for high scientific or technological instruction such as is imparted in large technical institutes in European countries. I recommend developments as need arises for higher and better instruction. The modest proposals I make are suited to the present times. If electrical power can be spared in future for *home or manual industries from the Cauvery Power Scheme, there will be need for* instruction in the methods of utilising the power and applying it to local industries. At the same time, in the existing industrial schools new industries may be introduced as their need and usefulness become proved. For instance Madura carving on wood, glass painting and burning for manufacture of stained glass, and stone carving on the model of the carving done in the new Palace of His Highness the Maharaja may well be added to the industries taught in the Mysore Industrial School. But until the present departments of industry are worked satisfactorily and until a separate School of Engineering is established, I would not advocate increasing the number of industries taught at Mysore.

No. 14668-77—Ed. F. 4-96, dated Bangalore, 7th April 1903.

Order thereon.—The provision of instruction in varied industrial pursuits for the bulk of the people is in many respects the pressing need of the time in Mysore as in other parts of India, and has for some time past engaged the anxious attention of the Government. A move in this direction was made in Mysore ten years back, and the experience since gained has shown the desirability of an early gradual expansion of this useful branch of public instruction. The Inspector General of Education visited some of the schools in the Madras Presidency and studied on the spot the systems which have been adopted in those institutions with success. His reports on the subject have been carefully considered by Government. As a sign of the times it may be noted with pleasure that a sum of Rs. 1,500 was subscribed in such a comparatively small place as Sagar for an Industrial School.

2. There are at present seven Industrial Schools in the State, two of which, those at Mysore and Hassan, are maintained by Government, and the rest, at Tumkur, Hassan, Mysore, Melkote and Kolar, are aided institutions. Government consider that the time has come to give a further impetus to Industrial Education in the State. They are not in favor of all the tuition being concentrated in one place; on the contrary, they would prefer that as many places as possible should benefit by the scheme, the cost, however, being in no place prohibitive or out of proportion to the benefits expected. The object in view should be, not the imparting of any ideal, theoretical or scientific course of instruction, but the teaching of such industries and trades on improved methods as are adapted to supply the present wants of the people, such as carpentry, weaving, silk-rearing, iron-work, rattan work, lacquer-work, etc., and to turn out a number of pupils every year fully equipped with the means of earning their livelihood. Government accept the view of the Inspector General of Education, that an Industrial School should ordinarily and to a large extent pay its own way. They should be more or less workshops carried on on business principles, and they should have large receipts from the sale of the articles produced, which should nearly cover the cost of their maintenance. It is also essential that where an industry has existed on commercial basis, it should be taught and developed in schools so as to provide a means of living for a large number of people and adding to the wealth of the country.

3. If such schools are established at approved centres by private persons or bodies, the Government will be glad to contribute liberal grants-in-aid towards the cost of their maintenance. The rest of the cost can always be met, if the institutions are managed on business principles as above indicated, from the sale proceeds of the

articles produced. As a first step, it seems desirable to arrange for the establishment of good industrial schools (other than for weaving, which will be separately dealt with *infra*) at the following places, namely, Channapatna, Sagar, Chitaldrug, Chikmagalur and Shimoga. In a few of these places there appear to exist some sort of schools already; these should be placed on a proper basis prior to their being recognised as aided or Government institutions; in others, such of the leading residents as are likely to be interested should be invited to arrange among themselves if possible, for the opening of industrial schools, prior to such recognition. The initial cost should in no case exceed Rs. 1,000 and the annual cost between Rs. 1,200 and Rs. 1,500 and both will be debited to Local Funds General. Government approve of the suggestion that, wherever there are carpentry and blacksmiths' classes, the manufacture, among other articles, of cheap country carts, and improved ploughs and other agricultural implements may be usefully undertaken and that patterns of such improved implements as have been practically tested and proved to be suitable to local requirements be supplied to all industrial schools having such classes, the cost thereof being met from the same fund as that to which the costs of starting and maintaining such schools are chargeable.

4. In the case of industries, for training in which facilities do not at present exist in the Mysore State, Government will be prepared to award annually from ten to twenty scholarships of from Rs. 15 to 20 each to selected applicants on condition of their undergoing training in the School of Arts, Madras or Bombay, or the Victoria Jubilee Institute, Bombay, or other institutions where such industries are taught. The Inspector General is requested to submit at an early date definite proposals on the subject. The educational qualifications of the applicants should, of course, be not lower than those which have been prescribed for their admission to the institutions concerned.

5. In connection with the weaving industry, Mr. Bhabha has submitted an interesting communication in which he explains the necessity for introducing and encouraging the application of the fly-shuttle arrangement to native looms and the training of youth in the weaving of various kinds and patterns of cloth on the fly-shuttle looms. The Government concur generally in his views and sanction the establishment of Weaving Schools with a carpentry class attached, in which elementary drawing also will be taught, at Hole-Narsipur, Dodballapur, Chiknayakanhalli and Molakalmuru, to be maintained tentatively for a period of two years. A department for dyeing will be attached to the weaving schools after they have come into working order. These schools will each of them be maintained at a cost not exceeding Rs. 2,500 (net) per annum, to which should be added a lump sum grant not exceeding Rs. 1,000 to meet initial expenses, both these items being debited to Local Funds General. The details as to management, supervision and accounting, will be left to the Inspector General, who will, in consultation with the Deputy Commissioners' concerned, whose sympathy and co-operation he may confidently count upon, settle them in the most satisfactory manner possible.

6. The remarks of the Inspector General regarding the formation of co-operative societies for the benefit of the weaver communities have much to recommend them and will be referred to Deputy Commissioners of Districts for favor of an early expression of opinion.

7. As regards the proposal to depute a certain number of schoolmasters (say 5) from villages where the occupation of silk rearing is followed by the rural population, to Mr. Tata's experimental farm at Bangalore, to be trained for a period of three months each in improved methods of growing mulberry trees, rearing silkworms and reeling, the Government would prefer that the proposal be tried experimentally in the case of a few selected schoolmasters from the Bangalore District and the result of such training reported upon before definite orders are passed on the scheme. The scholarships, etc., proposed for the selected teachers, and the scheme of work prescribed for them are approved, the extra cost involved being met from Local Funds General.

8. The Government sanctioned a grant of Rs. 20 per mensem in their Order No. 13379-80—Ed. 271, dated the 13th February 1902, in aid of the commercial classes managed by Mr. G. C. Lakshminaranaiya at Bangalore. This grant was raised to Rs. 30 in Order No. 11905-6—Ed. 293, dated the 16th February 1903. The subjects taught are typewriting, commercial geography, banking, etc. This institution is reported to be doing good and useful work. The Inspector General is requested to devote special attention to the development of this institution.

ORDER THEREON.—This review relates to the accounts and reports on the working of the District Funds for the year 1900-01.

2. As in the previous year, there were 10 Local Fund Circles including the Kolar Gold Fields Sanitary Board. The affairs of these Local Fund Circles continued to be managed by Boards as described in para 2 of Government Proceedings No. 6747-60—L. F. 21-1900, dated 28th October 1901.

3. The number of meetings held by the several Boards during the year is given below, as compared with that held during the year previous.

No.	Names of Local Fund Circles.	Number of meetings.	
		1899-00.	1900-01.

7	Shimoga	6	4
8	Tumkur	5	4
9	Kadur	4	5
10	Chitaldrug	4	4

In each of the Mysore and French Rocks Circles, only 3 meetings or 1 less than the prescribed number were held. In Mysore it is explained that no second meeting was convened in the first half of the year, owing to the prevalence of plague both in the City and in some of the Taluks during the months of September, October and November 1900. But no such explanation is furnished for not convening a meeting at French Rocks. Such omissions should be avoided in future.

4. The revenue, including the opening balance, and expenditure are shown in Appendices 1 and 2.

5. Appendix 1 shows that the revenue of the year increased from Rs. 5,81,220 to Rs. 5,92,272 or by Rs. 11,052, while the expenditure (Appendix 2) fell from Rs. 6,21,564 to Rs. 5,68,888 or by Rs. 52,676, which resulted in the increase of the closing balance from Rs. 2,42,143 to Rs. 2,65,527. The percentage of closing balances to receipts is given below. The attention of the Presidents of the French Rocks and Kadur Local Fund Boards, against whom there are debit balances is invited to para 9 of Government Proceedings No. 6747-60—L. F. 21-1900, dated 28th October 1901, and they are requested to take early steps to wipe off the debit balances and to maintain the usual working balance as soon as possible.—

7. The following two statements exhibit the details of original works executed in 1900-01 by the Public Works and Revenue Departments. Out of the total expenditure of Rs. 95,332 incurred during the year, Rs. 41,755 were spent on roads, Rs. 22,253 on bridges and tunnels, Rs. 5,565 on travellers' bungalows and musafir-khanas, and the rest on wells and other miscellaneous improvements:—

From the above it will be seen that both the Public Works and Revenue Departments exceeded budget limits in Bangalore and Kolar Circles and the Public Works Department in Kadur also, while in other Circles except Kolar Gold Fields, where most of the works provided for were not undertaken, the allotments allowed to lapse by the Public Works Department ranged between 2·83 lowest in Mysore to 29·20 highest in Chitaldrug, those allowed to lapse by the Revenue Department ranging between 7·46 lowest in Kadur and 70·79 the highest in Shimoga.

As in the previous year, the percentage of establishment charges on account of works executed by the Public Works Department was 17·5 per cent, while that of the works executed by the Departmental agency rose from 8·93 to 13·04 per cent.

11. The appended Statement No. 3 exhibits details of Civil charges incurred during 1900-01.

12. *II. Medical Scholarships.*—No portion of the cost of Medical students undergoing training for the grade of Hospital Assistants was debited to the Kolar Gold Fields Sanitary Board, and the increased expenditure shown against the remaining Circles as compared with that of the previous year is due chiefly to the supply of text books to the Mysore students undergoing training in the Madras Medical College.

13. *III. Hospital and Dispensaries.*—The number of Medical Institutions supported from District Funds remained the same as in the previous year. The following statement exhibits the number of hospitals and dispensaries, the number of patients treated in them, and the cost incurred in the several Local Fund Circles during the year as compared with those of the preceding year. The number of patients treated rose from 602,802 to 6,26,244 and the cost from Rs. 42,444 to Rs. 42,850. Government regret to observe that notwithstanding the clear instructions given in para 40 of Proceedings No. 4720-43—L. F. 103-92, dated 23rd September 1892, and reminder thereto (para 23 of Proceedings of 20th October 1901), the reports do

not embody statements showing the sum saved under Contingencies in each Local Fund dispensary and credited to Medical budget together with the aggregate amount credited in previous years and the amount spent therefrom.—

14. *Midwives.*—The number of midwives employed, the cost incurred and the number of cases attended to by them are detailed in the following statement. There were 76 midwives as against 73 of the previous year, and the number of cases attended to by them was 3,955 or on an average 55 each per annum.—

The figures above given do not include the number of cases attended to by the Kolar Gold Fields midwife and the midwives paid from Municipal Funds.

15 *V. Travellers' Bungalows and Musafirkhanas.*—Appendix No. 4 furnishes particulars of expenditure incurred on account of the up-keep of 3rd class travellers' bungalows and musafirkhanas and the number of halts made by and fees collected from travellers. The report for the Kadur Circle furnishes no information in regard to the halts made by travellers in travellers' bungalows on the ground that

this information is not available in the President's office. It should be explained whether bungalow books are not supplied to the several bungalows and the number of halts, etc., recorded therein regularly.

16 *VI. Conservancy and Sanitation.*—The expenditure incurred on account of special conservancy establishment, opening conservancy lanes and congested parts, filling manure pits, etc., in rural parts of the several Local Fund Circles, except Mysore and French Rocks, for which no information is furnished, amounted to Rs. 18,648 in 1900-01, as against Rs. 8,652 of the previous year, as shown bellow:—

The Village Sanitation Rules were introduced into 439 villages of the Tumkur District containing not less than 100 houses each, and the result of the working of the rules therein was satisfactory. The President of the Hassan District Fund Board reports that he was satisfied from personal inspection that the villagers were doing their best to remove manure pits and to keep the surroundings of their houses tolerably clean and that there has been a gradual fall in the number of convictions under the Village Sanitation Rules. But similar information has not been given in other reports, and the statements showing the number of villages into which the Village Sanitation Rules were introduced, the number of persons involved and the amount of fine levied in cases of conviction, have not been embodied in any of the reports except Shimoga. The attention of the Presidents is invited to para 26 of Government Proceedings No. 6747-60—L. F. 21-1900, dated 28th October 1901, and they are requested to see that such statements are invariably furnished with their future reports.

17. *VII. Vaccination.*—As in previous years, the pay and batta of the peon attached to the Deputy Inspector of Vaccination and the cost of animal vaccination were alone charged to the District Funds, the pay of the Taluk Vaccinators and of the Deputy Inspectors of Vaccination being debited to the Medical budget. The statement showing the number of vaccinators employed and the result of the operations has not been embodied in the report of the Kolar Gold Fields Sanitary Board, an omission due probably to the information having been included in the report of the Kolar Local Fund Board. In future, however, particulars of vaccination in the Kolar Gold Fields area should be submitted with the report of the Sanitary Board. From the information given in the remaining reports, it appears that 44,943 persons were vaccinated during the year, against 32,844 in the preceding year as detailed in Appendix 5.

18. *Births and Deaths.*—The number of births and deaths registered during the year is exhibited in Appendix 6. The total number of deaths in rural parts from all causes rose from 73,852 to 86,410 while the number of births fell from 80,076 to 75,743.

19. *IX. Contribution.*—The expenditure debited under this head (on account of the District Fund quota of the cost of construction and repair of dispensary buildings and repairs of travellers' bungalows as also on account of the maintenance of District Fund roads in the Head-quarter Municipalities) was Rs. 7,447-15-0 as against Rs. 9,424-1-7 in 1899-1900. The decrease is chiefly due to the non-payment of contribution by the Shimoga Board towards the cost of the construction of the Chamaraja Memorial Hall in the Shimoga town.

20. *Amrut Mahal Bulls.*—No bulls were maintained in the Bangalore, Shimoga, Kadur and Chitaldrug Circles for breeding purposes, while the reports of the Mysore and French Rocks as well as the Kolar Gold Fields Circles furnish no information on the point. In the Local Fund Circles of Kolar, Tumkur and Hassan, however, 7, 1 and 3 bulls were respectively maintained but without any cost to the District Funds. The results obtained in Tumkur have not been furnished, and the seven bulls of the Kolar District are not being used by raiyats owing to their fierceness and wildness. Two out of the three bulls of the Hassan District being old, one of them is said to have been sold already, while the other is about to be disposed of, if found unfit, the third one supplied to the Arsikere Taluk being reported to have been killed. Separate reports should be submitted about the disposal of these unserviceable animals.

21. *Village School Fund.*—During the year under review, 1,637 schools (15 Anglo-Vernacular, 83 Taluk Branch, 1,412 Hobli, 3 Normal, 123 Aided Village Indigenous and 1 Sanskrit school) with an average strength of 53,601 boys and girls were maintained at an aggregate cost of Rs. 2,19,894. The aggregate income from fees realized was Rs. 3,898 as shown in Appendix 7.

22. The details of sums credited under the Local Funds General and the expenditure incurred therefrom during the year under review are shown in the following statement.—

The above expenditure includes 2/3rds cost of the Indigenous Hospital and the entire cost of the Industrial School at Mysore. From the report submitted by the President of the Mysore Local Fund Circle on the working of the Industrial School, it would appear that the total strength at the end of the year was 111 or 18 less than in the preceding year. The total income and expenditure of the school, during the year was Rs. 1,681-1-9 and 8,929-13-1, as against Rs. 2,419-6-3 and 11,900-14-8, respectively, of the previous year.

23. The individual statement of works undertaken by the Revenue Department from grants made from Local Funds General are shown in the appended statement, of which a classified abstract is given in Appendix 8.

The Government are constrained to remark that there has been much avoidable delay in the submission of the reports, which were due on 30th September 1901. None of them except the one relating to the Kadur Circle were received on or before the due date, some having been received so late as 5th March 1902. The Presidents are requested to see that these reports are submitted punctually on or before the due date in future.

Letter No. 540, dated 13th February 1903, from the President, District Fund Board, Tumkur, submitting the revised District Fund budget estimates for the Tumkur Local Fund Circle for 1902-03.

No. 15076-87—L. F. 4-02, DATED BANGALORE, 20TH APRIL 1903.

ORDER THEREON.—The modifications proposed are shown hereunder:—

Items.	Already sanctioned.	Now proposed.	Increase or decrease.
	Rs.	Rs.	Rs.
(1) Opening balance	28,770	43,117	+14,347
Expenditure—			
A. Public Works to be executed by Public Works Department.	52,507	51,802	—705
B. Public Works to be executed by Revenue Department.	10,720	12,513	+1,793

2. *Opening Balance.*—As the increase under this head is in accordance with the accounts of the Comptroller, the same will stand.

3. *A. Public Works.*—The reduction of Rs. 705 under this head is due to the transfer of the 12 miles of Holalkere-Huliyar road to the Chitaldrug District for maintenance and to the reduction under supervision charges.

4. *B. Public Works.*—The present budget provides for Rs. 4,130 on account of incomplete works sanctioned in Proceedings No. 9738-9—L. F. 4-02, dated 10th December 1902, in lieu of Rs. 2,500 allowed in the original budget, as well as for establishment charges (Rs. 163) on the increased provision for works. The provision will stand.

5. The revised budget now sanctioned stands thus:—

	Rs.
(1) Opening balance on 1st July 1902	43,117
(2) Estimated receipts for 1902-03	73,450
Total ...	1,16,567
(3) Estimated expenditure for 1902-03	85,985
(4) Closing balance	30,582

READ—

Letter No. 741, dated 20th February 1903, from the Deputy Commissioner of the Mysore District, submitting the Supplemental District Fund budget estimates of the French Rocks Circle for 1902-03.

No. 15309-20—L. F.6-02, DATED BANGALORE, 24TH APRIL 1903.

ORDER THEREON.—The supplemental grants and the reduction proposed in the budget are as follows :—

Expenditure.

	As per original budget	As per supplemental budget	Increase
A. Public Works to be executed by P. W. D.—	Rs.	Rs.	Rs.
II Repairs	20,360	24,615	4,255
III Establishment	3,563	4,307	744
IV Tools and plant	102	123	21
B. Public Works to be executed by the Rev. Dept.—			
II Repairs	2,460	2,799	339
III Establishment	546	580	34
C. Civil Charges—			
IV Midwives	655	693	38
X Miscellaneous cost of feeding impounded cattle.	150	50	Decrease 100

2. The correct total of the estimated revenue for 1902-03 is Rs. 42,681 and not Rs. 42,861 as erroneously entered in the present budget.

3. *A. Public Works.*—Under "II. Repairs" provision has been made for the marginally noted two items sanctioned by Government and for making good at a cost of Rs. 858 the damages caused to a bridge across the French Rocks Station-Nelligere road and also for repairs of travellers' bungalows, *viz.*, Rs. 623. This will be retained but a statement showing the particulars of the bungalows requiring repairs and the estimated cost of each should be submitted.

	Rs.
1. Increase of mileage allotment of certain roads sanctioned in Proceedings No. 9248-9—L. F. 6-02, dated 2nd December 1902	2,415
2. Repairing two bridges across Seringapatam-Chamarayapatna road sanctioned in Proceedings No. 10633-4—L. F. 6-02, dated 12th January 1903	356
Total ...	2,771

4. *B. Public Works, II. Repairs.*—The supplemental grant (Rs. 339) proposed under this head is for the completion of the well at Kalamaddamadoddi and is in accordance with Proceedings No. 10633-4—L. F. 6-02, dated 1st January 1903.

5. *C. Civil Charges, IV. Midwives.*—The provision of Rs. 38 made under this head to meet a moiety of the salary of the midwife of the French Rocks Sub-Taluk applied for in President's letter No. 133, dated 22nd December 1902, is passed.

6. The other items call for no remarks.

7. The revised budget estimates of the French Rocks Local Fund Circle for 1903-04, including the reappropriation sanctioned in Proceedings No. 6064-6—L. F. 6-02, dated 21st October 1902, are as shown in the statements appended, an abstract of which is given below :—

		Rs.
(1)	Opening balance	10,475
(2)	Receipts	42,681
	Total	53,156
(3)	Expenditure	44,266
(4)	Closing balance	8,890

The closing balance being less than the prescribed working balance by Rs. 1,780, endeavour should be made to maintain the prescribed minimum by effecting retrenchment in the sanctioned items wherever possible.

Item 1.—The necessity for making new provisions for roads Nos. 12, 25 (*a*) and 25 (*b*) and for the increased rates of mileage allotment for roads Nos. 4, 16, 21 (3), 23, and the reason for reduction of mileage rates of roads Nos. 17 and 25 have been explained in the memo which accompanies the budget. The increased allotments are sanctioned.

Item 2.—The usual allotment for the 10 miles of Koratagere-Goribidnur road is shown against two different roads with the view of adopting the same name as is given to the part of the road in Kolar District. But no explanation is given why there has been an increase of 1½ miles in the total length of the roads as now named.

Item 3.—The reduction in the length of the Huliyar road is due to the transfer of 12 miles to the Chitaldrug Local Fund Circle consequent on the abolition of the Huliyar Sub-Taluk and the formation of the Hosdurga Taluk.

These provisions will be retained at Rs. 31,405, which is the correct total of the details given in Enclosure C and not Rs. 31,407 as entered therein and the consolidated budget statement, pending information regarding item No. 2.

4. *B. Public Works.*—The provisions under "I. Original works" and "II. Repairs" will be retained subject to detailed lists of works to be undertaken being furnished. It is observed that the details of provision for repairs should have been furnished in proper form, Enclosure C, and not in Form B as has now been done.

CIVIL CHARGES.

5. *I. Office Establishments.*—The provision made in the present budget for the annual increments due to the clerks in the District Office, accounts for the increase under this head, which is approved.

6. *II. Medical Scholarships.*—Pending the receipt from the Senior Surgeon of a detailed statement of charges to be provided for under this head, the provision will stand.

7. *IV. Midwives.*—The decrease under this head is due to the salaries of midwives being reduced to the uniform scale of Rs. 15 per mensem sanctioned in Proceedings No. 2273-84—L. F. 55-93, dated 3rd August 1902.

8. The other items call for no remarks and are passed.

9. The budget estimates of receipts and expenditure of the Tumkur Local Fund Circle are sanctioned as per particulars shown in the appended statements, the abstract results being given below :—

A MEMO EXPLANATORY TO ACCOMPANY THE DISTRICT FUND BUDGET FOR THE YEAR 1903-04.

Original Works.

1. *Opening out cart-track from Tiptur to Kodagihalli.*—The cart track is being used now for traffic and the estimate will be closed this official year, and it is necessary to provide annual repair grant for this road, and accordingly provision is made under "Repairs."

2. *Opening out cart-track from Bukkapatna to Hagalvadi.*—The estimate is pending disposal as the compensation for lands required has not been as yet settled and provision is made for the same in the budget.

3. *Opening out a new road from Gubi to Honnudike.*—This road would have been opened out fully during the current year if funds were granted. But anyhow major portion of the work would be completed and annual repairs are necessary as the portion completed is being used and provision is made for the same under "Repairs."

4. *Metalling Tumkur-Maddur road.*—This year's grant would be fully worked up, as the work is in rapid progress; if more funds are available, the estimate can be worked up sooner than intended.

5. *Constructing a 3rd class musafirkhana at Turuvekere.*—This work also is in good progress and the building would be completed this season.

6. *Metalling the worst portions of Tiptur-Dudda road.*—This is a new work provided for next year. This road gets very heavy traffic and is now maintained as a "Gravel" road. Both during hot and rainy weather, the surface gets very dusty and works into bad holes and also heavy. The section in Hassan Division is fully metalled and is maintained at a mileage grant of Rs. 100. It is necessary to metal the worst portions, and a special grant is accordingly provided.

7. *Completing the cart-track from Chiknayakanhalli beyond Madanmadu to join Tumkur-Chelur-Hagalvadi road.*—This road is opened out from Chiknayakanhalli to Madanmadu, and it is necessary to complete it till it joins the Tumkur-Hagalvadi road. The traffic from Madanmadu generally resorts to Bellavi Shandi, and it now finds very difficult to wade through hilly tracks. It is necessary to complete the short length of about six miles to restore through-communication, and a grant is inserted for this section.

8. *Diverting Kibbanahalli-Turuvekere road in the 11th mile.*—This is a small estimate approved by the President, but for want of funds, was not taken up this year, and provision is therefore made for next year.

Annual Repair Budget.

The following charges are proposed for reasons noted against each from current year's grant for adoption during next year, *i. e.*, 1903-04:—

Item No. 4. Thimrajanahalli-Bellavi road.—From Rs. 35 per mile to Rs. 50 per mile, total increase Rs. 75. The road gets heavy traffic from Sira side to Bellavi Shandi, and the increase is necessary.

Grant for 1902-03—
5 miles at Rs. 35 = 175.
Proposed grant for 1903-04—
5 miles at Rs. 50 = 250.
Excess Rs. 75

Item No. 11. Koratagere-Goribidnur road.—Length 10 miles, at Rs. 50. The present nomenclature is a misnomer, as the Kolar Division name the road from Goribidnur to Maddagiri. The proper nomenclature to be Koratagere-Baichapur road, 8 miles at Rs. 50 = 400 and Goribidnur-Maddagiri road to suit the mileage of Kolar Division 3½ at Rs. 50 = 175 against 10 miles at Rs. 50 = 500. Increase Rs. 75.

Grant for 1902-03—
Koratagere-Goribidnur road.
10 miles at Rs. 50 = 500.
Proposed grant for 1903-04—
Koratagere-Baichapur road 8 miles at Rs. 50 = 400.
Goribidnur-Maddagiri road 3½ miles at Rs. 50 = 175
575
Excess Rs. 75.

Item No. 12a.—A new road was opened from Dodhalli to Hoskote in Pavagada Taluk by the Revenue Officers, on a line traced by the Public Works Department, from District Funds. This nice road is getting badly cut up and is in fact becoming unserviceable for want of annual maintenance grant. It is proposed to maintain this track at a mileage grant of Rs. 30 annually. Increase 5 miles at Rs. 30 = 150.

Grant for 1902-03—
Nil.
Proposed grant for 1903-04—
5 miles at Rs. 30 = 150.
Excess Rs. 150.

Item No. 14. Holalkere-Huliyar road.—The length maintained till now in Tumkur Division was 16 miles and by the breaking up of Huliyar Sub-Taluk and forming Hosdurga Taluk 12 miles of this road is transferred to Chitaldrug Division. This affects the budget by a decrease of Rs. 600 on 12 miles at Rs. 50. The length to be maintained now is only 4 miles at Rs. 50 = 200.

Grant for 1902-03—
16 miles at Rs. 50 = 800.
Grant for 1903-04—
4 miles at Rs. 50 = 200.
Savings Rs. 600.

Item No. 16. Yediyur-Tiptur road.—This road also gets very heavy traffic from Turuvekere-Channarayapatna etc., parts to go to big Tiptur Shandi. With the present grant of Rs. 50 per mile, the surface could not be maintained in a satisfactory condition; a small increase in mileage rate from Rs. 50 to 60 is therefore proposed. The increase will be Rs. 310.

Grant for 1902-03—
31 miles at Rs. 50 = 1,550.
Proposed grant for 1903-04—
31 miles at Rs. 60 = 1,860.
Excess Rs. 310.

Item No. 17. Nelligere-Sira road.—The traffic on section between Chelur to Ankasandra and on very near Sira, is not very heavy, and in addition the surface received a metal re-coat in most sections by metal collected during late famine. The road can very well forego a portion of its grant. It is now suggested to decrease the rate from Rs. 70 to 55 to meet the excess proposed for other roads. Decrease will be 50 at Rs. 15 = 750.

Grant for 1902-03—
50 miles at Rs. 70 = 3,500.
Proposed grant for 1903-04—
50 miles at Rs. 55 = 2,750.
Savings Rs. 750.

Minor Branch—under Item No. 21 (3). Cart-track from Chikanahalli to Madanmadu.—The first three miles of this track are fully opened out for traffic, on an estimate sanctioned for Rs. 3,038. The total length now fit for traffic is 14¼ miles and gets a grant of Rs. 428 on the whole. The ghat section is fully three miles and gets badly damaged during rains. Increase in grant is necessary to keep up traffic. It is proposed to allot at Rs. 50 per mile for the whole length of 14¼ miles. The increase will be Rs. 284.

Grant for 1902-03—
14¼ miles at Rs. 30 = 428.
Proposed grant for 1903-04—
14¼ miles at Rs. 50 = 712.
Excess Rs. 284.

Item No. 23. Tiptur-Channarayapatna road.—This road gets very heavy traffic from Channarayapatna side in coccoanuts and jaggory to Tiptur Shandi. A special grant of Rs. 1,747 was allotted during last year to metal 5th and 6th miles. It is necessary to increase the grant from Rs. 50 per mile to Rs. 80 per mile, as the length maintained in the division is short. The net increase will be Rs. 180.

Grant for 1902-03—
6 miles at Rs. 50 = 300.
Grant for 1903-04—
6 miles at Rs. 80 = 480.
Excess Rs. 180.

Item No. 25. Bidramanagudi-Huliyar road.—A portion of the through traffic from Huliyar side will be diverted to the newly opened Tiptur-Kodagihalli road, and savings can be effected in the mileage rate to meet the extra provision now required for the maintenance of Tiptur-Kodagihalli road. It is therefore proposed to decrease the grant from Rs. 80 to 60 per mile and thus save on the whole length Rs. 520.

Grant for 1902-03—
26 miles at Rs. 80 = 2,080.
Grant for 1903-04—
26 miles at Rs. 60 = 1,560.
Savings Rs. 520

Item No. 25 (a) Tiptur-Kodagihalli road.—A new road is almost opened for traffic at an outlay of Rs. 3,330, and it behoves to be maintained also, as the through traffic from Huliyar side take to this road. It is proposed to allot a grant of Rs. 550 for 11 miles at Rs. 50 per mile.

Grant for 1902-03—
Nil.
Proposed grant for 1903-04—
11 miles at Rs. 50 = 550.
Excess Rs. 550.

Item No. 25 (b) Gulur-Honnudike road.—A new road of 6 miles in length is being opened out from Gulur to Honnudike on an estimate of Rs. 3,956. Portions opened out are being used by traffic and their maintenance is necessary. A small annual grant of Rs. 180 at Rs. 30 per mile is entered for approval.

Grant for 1902-03—
Nil.
Proposed grant for 1903-04—
6 miles at Rs. 30 = 180.
Excess Rs. 180.

N. B.—The proposals noted above result in a net decrease of Rs. 66 over the usual grant of Rs. 30,123.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ AGAIN—

This office docket No. 6914—L. B. P. 326, dated the 5th November 1902, to the address of the Senior Surgeon and Sanitary Commissioner with the Government of Mysore, forwarding copy of a report by Dr. B. R. Sawhney, Chief Medical Officer, Jammu, showing the effects of desiccation of dwellings and effects in the Jammu City and Province, with a request that the system referred to therein may be carefully experimented in Bangalore and Mysore and the result watched and reported.

ALSO—

Letter No. G. 356, dated the 2nd April 1903, from the said officer.

1. I have the honor to forward for the information of the Government of His Highness the Maharaja of Mysore, a report on the value of the disinfection of houses by means of fire, as a remedy for the prevention and suppression of plague. I may mention that these experiments were carried out at my request and partly under my direction. This method of disinfection was first introduced by Dr. Sawhney of Cashmere, and the results said to have been obtained by him in the suppression of plague at Jammu were so assuring that it was considered worthy of a trial here.

2. Dr. Sawhney claimed that his method was capable of destroying the plague bacillus not only in dwellings, but also in infected clothing, and that bugs, fleas and other vermin were also killed. Before recommending the introduction of this method of disinfection in all towns and villages in the Province, it occurred to me desirable to put it to a practical test, for which purpose I asked Dr. M. Srinivasa Rao, Government Bacteriologist, to carry out certain experiments (as detailed in his report) to prove, if possible, whether the application of heat in the form recommended by Dr. Sawhney, possessed the power of destroying the plague bacillus in living cultures or not.

3. From his first experiments, it will be seen that all the bouillon agar cultures which had been exposed in the rooms were eventually found to be sterile, whilst only 50 per cent of the petri dishes containing infected cowdung and clothing were rendered sterile. This we both attributed to the fact that the heat evolved was not sufficient to sterilise the infected cowdung and earth and rags, and that if arrangements could be made to generate more heat, more satisfactory results might be arrived at.

4. In the second set of experiments five rooms were operated on as follows :—

In No. I room there was a heap of cowdung cakes to every 25 square feet of floor area. The temperature registered was 80° C. In this room the following cultures were exposed :—

Three petri dishes (with covers on) containing infected cowdung and earth	...	...	Two were rendered sterile,
Three tubes of agar cultures	...	...	All sterile.
Three tubes of bouillon	...	...	All sterile.
Three petri dishes of infected rags	..	...	All sterile.

In No. II room one heap of cowdung cakes was employed for every 29 square feet of floor area. The temperature of this room was not ascertained, as, being an inside room, access could not be had to it.

The following cultures were exposed :—

Two petri dishes of infected cowdung	...	...	One was not rendered sterile.
Two tubes agar cultures	...	...	Both sterile.
Two tubes bouillon ...	...	...	Both sterile.
Two petri dishes of infected rags	...	...	Both sterile.

In No. III room one heap of cowdung cakes was employed for every 29 square feet of floor area. Temperature 65°C. :—

Two petri dishes cowdung ...	...	...	One not sterile.
Two tubes agar cultures ...	...	...	Both sterile.
Two tubes bouillon ...	...	...	One not sterile.
Two petri dishes of infected rags	...	...	Neither sterile.

In No. IV room one heap to every 29 square feet of floor area :—

Two petri dishes cowdung ...	...	...	One not sterile.
Two tubes agar cultures ...	...	...	Both sterile.
Three tubes bouillon ...	...	...	All sterile.
Two petri dishes infected rags	...	...	Both sterile.

In No. V room one heap of cowdung cakes to every 33 square feet of floor area :—

One petri dish cowdung cake	...	...	Not sterile.
One tube agar cultures	...	...	Sterile.
One tube bouillon cultures	...	...	Sterile.
One petri dish infected rags	...	...	Not sterile.

5. From the above results it will be seen that in room No. I, with the exception of one petri dish containing infected cowdung, everything was rendered sterile. In this room the temperature registered wa s80°C., and this I consider due to the fact that one heap of cowdung was used for every 25 square feet of floor area.

In No. II room the results were equally satisfactory.

In No. III room the results were not so satisfactory, and this is attributed to the fact that a pane of glass was missing from the window and it is probable that the heat escaped.

In No. IV room the results obtained were on the whole satisfactory.

In No. V room results unsatisfactory, most probably due to the fact that the amount of fire per floor area was insufficient.

6. I enclose a letter received from Assistant Surgeon Mr. P. Palpu, D. P. H., Health Officer of the City of Bangalore, in which he records his experience of the efficacy and popularity of this method of disinfection.

The advantages of this method over chemical disinfection may, I think, be summed up as follows :—

(1) It is extremely popular among all classes.

(2) It is more economical and does not require a large and costly staff.

(3) It does not require highly trained persons to supervise it.

(4) The material is readily available in all villages.

(5) It does not require any prolonged absence from the house on the part of the inmates, as the house can be occupied shortly afterwards.

(6) If properly applied, it possesses the property of destroying the plague bacillus, as proved by practical tests on living cultures.

7. It may possibly be argued that it does not and cannot destroy the plague bacilli which are supposed to exist in the floors of houses, especially those where cowdung is employed, as the heat cannot penetrate into the earth in the same way that perchloride of mercurry would. This objection might be met by applying chemical disinfectants to the floors prior to employing heat.

8. Taking everything into consideration, I am inclined to believe that in this method of disinfection, we possess not only a very valuable remedy, but one that is easy of application and readily available in all towns and villages in the Province. I have therefore the honor to request that the Government of His Highness tho Maharaja will be pleased to empower me to sanction such sums as may be required from time to time for this object. I am of opinion that this method of disinfection should be made compulsory in all infected houses and those houses on either side should also be compulsorily disinfected.

9. Since writing this, I have received a further communication from Dr. M. Srinivasa Rao (herewith enclosed) on the value of Dr. Sawhney's Desiccator. He tried it in a room having a superficial area of 44 square feet, in which three tubes of bouillon and agar cultures of the plague bacillus were kept and the desiccator became red hot, the temperature registered only 2½ feet from it was only 50° C. and after three hours none of the cultures were rendered sterile. From this he concludes that the desiccator is of no use whatever for disinfecting purposes. Possibly if two desiccators had been used the results might have been different. My own experience of these desiccators is that, they are very cumbrous, the fuel required for their use is more costly, and not readily available. I question if the same degree of heat can be obtained by them as can be got out of cowdung cakes arranged in the manner as shown above, *viz.*, one heap to every 25 square feet of floor area, which standard should invariably be adopted.

(Enclosures to the above.)

(a) Endorsement No. 547—Pg., dated the 29th January 1903, from Mr. H. H. Sparkes, Deputy Commissioner, Bangalore District, forwarding letter No. 1368, dated the 28th January 1903, from Mr. P. Palpu, L.M. & S., D.P.H., Health Officer, Bangalore City, to the address of Lieutenant-Colonel P. H. Benson, M.B., I.M.S., Senior Surgeon and Sanitary Commissioner with the Government of Mysore.

In forwarding this letter to the Senior Surgeon I would strongly recommend the adoption of this method of disinfection by heat. I have demonstrated this method to many towns and villages in the district, and in every single instance the people have declared themselves readily to adopt it and help with the aid of bratties, etc., if some one is present to show them what to do. Colonel Foreman, who witnessed an experimental case in the Fort one morning, appeared to be strongly in favor of it. If anything is going to be done, now is the time to do it, as just at present the plague appears to be at its worst in the district and the towns and villages are evacuated and they should be disinfected before the people are allowed to return. I would recommend beginning being made with the Bangalore City, after which the trained staff will be available for the towns and villages.

Letter No. 1368, dated the 28th January 1903, from Mr. P. Palpu, L. M. & S., D. P. H., Health Officer, Bangalore City, to Lt.-Col. P. H. Benson, M. B., I. M. S., Senior Surgeon and Sanitary Commissioner with the Government of Mysore.

With reference to your No. 59-60—P., dated the 6th November 1902, calling for a report on the result of disinfection by desiccation, I have the honor to state that since the 6th of December, when the new method was commenced to be given a trial, 20 houses and two chattrams were disinfected by heat, and that in none of these houses has there been any fresh case reported although out of 735 houses disinfected in the usual way with perchloride of mercury lotion during the same period, the disease recurred in nine instances. In one of the chattrams referred to, the inner rooms were disinfected by heat while the outer ones were done with lotion. The disease recurred in one of the outer rooms, while among the families occupying rooms in the interior, no fresh cases occurred. This speaks well of the new method; but till further statistics are available, it may be premature to give any definite opinion. The method, however, has many advantages. In the first place it is popular. People do not feel any great inconvenience, as they need not find temporary accommodation for themselves and are not put to the trouble of having to move out their "saman" and re-arrange them afterwards. These are left in the rooms during disinfection. It does not also want a large staff in arranging the bratties and setting fire to them. When bratties are properly arranged, the temperature can easily be raised to the point required. The heat pervades every part of the room and there is very little chance of infected material, if any, in nooks and corners, being left as they are, as they occasionally happen in disinfection with chemicals. In addition to destroying disease germs, the heat kills also fleas, bugs and other vermin which in many of our houses are a constant source of annoyance. Cockroaches, lizards, etc., drop down dead during the process, while rats either die in their holes or run away if that be possible. The smoke generated is also an advantage, for, it blacknes the walls and ceiling so much as to necessitate subsequent whitewashing, which is a useful adjunct. Another advantage of disinfection by heat is that it destroys or dries up the organic matter with which the walls and floor of most of our houses are usually saturated, and which probably forms a favorable medium for the growth of germs, and thus prevents their further development, at least, for a time.

The cost of the method is not much. The 20 houses and two chattrams have cost only Rs. 1-8-0 each on an average, and it is believed that when more houses are done, the cost would go down still further. As bratties are easily procurable and are available in most houses, people occasionally supply them themselves free of cost. In villages, I am informed any amount of these can be had for the mere asking and that when the new method is explained to them, the villagers readily supply the bratties, arrange them themselves and have all the houses disinfected at the same time, if that be required, and that most willingly.

(b) Letter No. 350, dated the 9th March 1903, from Dr. M. Sreenivasa Rao, M.A., M.D., C.M. and B. Sc. (Edin.), Chemical Examiner and Bacteriologist to the Government of Mysore.

I have the honor to state that eight houses in Appajaiya's Agraharam in Chamrajpet, Bangalore, were disinfected by the method of burning heaps of bratties (cowdung cakes). One room in each of these houses was chosen for the purpose of experiment. The areas of the rooms varied from 108 to 300 square feet. Heaps of "bratties" were so arranged as to have one heap for every 40 square feet. Each such heap measured on an average 2 feet in diameter, and was one foot high containing about 150 "bratties." Thermometers were kept in each room both at the level of the floor and at heights varying from one foot to eight feet. The readings of the thermometers were noted half an hour after the "bratties" were set on fire and also after they were completely burnt. Those on the floor registered temperatures varying 60° to 75°C. and those above the level of the floor 70° to 90°C. Petri dishes containing a dried mixture of cowdung and earth previously sterilised and others containing pieces of sterilised rags both infected with an emulsion of plague bacillus, and agar and bouillon cultures of plague bacillus in test tubes were exposed in the rooms both on the floor and at heights varying from ½ foot to 4 feet 5 inches. In the two mud-roofed houses and in the other six tile-roofed houses, petri dishes and test tubes were taken out at the end of one hour and three-quarters of an hour, respectively; and bouillon cultures were made from them. These were incubated for 48 hours and examined. The results were as follows:—

All the bouillon and agar tubes were found sterile. Fifty per cent of the petri dishes containing a mixture of infected cowdung and earth and rags were not sterile.

I am of opinion that the heat evolved was not sufficient to sterilise the infected cowdung and earth mixture and rags, and that if arrangements are made to generate more heat, a more satisfactory result may be arrived at.

(c) Letter No. 356, dated the 16th March 1903, from the same officer.

In continuation of my letter No. 350, dated 9th March 1903, I have the honor to state that further experiments were made in a house (of five rooms) in Chamrajpet, Bangalore City.

* * * * *

In room No. I nine heaps of "bratties" containing 60 in each heap, were arranged so as to have one heap for every 25 square feet. In rooms Nos. II and III there were four heaps having one for every 29 square feet. In the IVth room, there was a similar arrangement but with 7 heaps. In room No. V there were two heaps, one for every 33 square feet. Thermometers were placed only in rooms Nos. I and III, it being impracticable to take their reading if kept in other rooms. The thermometer in room No. I registered 80°C. three-quarters of an hour after the "bratties" were set on fire, while that in room No. III showed only 65°C. Infected rags and cowdung and earth mixture and agar and bouillon cultures of plague bacillus were exposed in the rooms and bouillon cultures were made from these as before. In rooms Nos. I and IV which contained 9 and 7 heaps of bratties respectively, the results were more satisfactory than in others. In these, all the bouillon and agar cultures and rags were found sterile. One petri dish in each, containing infected cowdung and earth, was not rendered sterile. In room No. II only one petri dish containing infected cowdung and earth was not sterile. In room No. III, one bouillon culture, two petri dishes with infected rags and one with infected cowdung and earth remained unsterilised. In room No. V one petri dish containing infected cowdung and earth and another with rags remained unsterilised. From these results, I consider that the heat was more evenly distributed in rooms Nos. I and IV in which all the agar tubes were melted. Houses will, I think, be efficiently disinfected if the heaps of "bratties" containing 60 in each are so arranged as to have one heap for every 25 square feet of a room.

(*d*) *Letter No. 368, dated the 26th March 1903, from the same officer.*

I have the honor to state that the desiccator was used in a room measuring 44 square feet in a house in Chamrajpet Agraharam, Bangalore City. The desiccator was first filled with pieces of coal and "bratties" to the depth of about an inch and with the aid of kerosine oil was set on fire. Ten minutes afterwards, the desiccator was filled to the top with coal and an hour after, the lid was put on. Plenty of smoke was given off through the flues for an hour and a half and the desiccator became red hot three hours after the coal was set on fire. Three bouillon and nine agar cultures of the plague bacillus were kept in different parts of the room at the commencement of the experiment. Two thermometers which were kept at about 2½ feet from the desiccator registered only 50°C. at the end of three hours. Cultures were made from the exposed tubes and incubated for 48 hours, and on examination it was found that none of the tubes exposed had been rendered sterile. I am therefore of opinion that the desiccator is of no use whatever for disinfecting purposes.

No. 15251-2—L. R. P. 741, DATED BANGALORE, THE 22ND APRIL 1903.

ORDER THEREON.—Government have read with interest the report of the Senior Surgeon, and though nothing definite can be said, at this stage, on the utility or otherwise of disinfection of infected houses by desiccation generally, yet the results of the experiments already made justify its continuance for a further period, say six months. The Senior Surgeon is accordingly authorized to incur such small expenditure as may be necessary in the initial stage and within his powers of sanction and include the same in the probable monthly statement of expenditure. The Senior Surgeon will give such instructions as may be necessary to supplement this desiccation with the chemical disinfection of the floor in cases where such a course may be deemed advisable or necessary.

2. Government hope that detailed statistics will be maintained in every case and be available as to the number of houses so disinfected with particulars showing the number of them wherein there have not been fresh cases since such disinfection.

3. It is desirable that the Cities of Mysore and Bangalore should be completely disinfected in the manner above mentioned, and the Senior Surgeon is requested to take early action.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

Letter No. 476, dated 14th February 1903, from the President of the Municipalities in the Kadur District, submitting, with reference to Government Proceedings No. 7066-8—L. F. 61-92, dated 8th November 1902, a supplemental budget of the Tarikere Municipality for 1902-03 with two estimates for the marginally noted works for Rs. 2,720.

	Rs.
1. Constructing V-drains in Annappa's bidi ...	1,595
2. Ditto Kavadiger bidi ...	1,125
Total ...	2,720

No. 15292-3—L. F. 20-02, DATED BANGALORE, 23RD APRIL 1903.

ORDER THEREON.—The supplemental grants applied for in the above are for the purposes noted below:—

	Rs.
I. Opening out 40 roads	1,596
II. Compensation for lands and houses to be acquired for opening the above roads	765
III. For constructing drains and a slaughter-house at an estimated aggregate cost of Rs. 3,460	639
IV. Supervision charges	292
Total ...	3,292

2. *VIII. Public Works, (b) Roads, original.*—The provision made under this head, in accordance with the instructions contained in Government Proceedings No. 7066-8—L. F. 61-92, dated 8th November 1902, to open out 40 roads at a total cost of Rs. 2,361, is passed.

	Rs.
Roads	1,596
Compensation	765
Total ...	2,361

3. *VIII. Public Works, (d) and (h).*—As sufficient funds are not available for the two works noted in the margin, the appropriation for the current year is proposed to be limited to Rs. 639 which is allowed, with the observation that the estimates submitted for the proposed drains will be separately dealt with and that the one relating to the slaughter-house should be submitted early.

	Rs.
1. Constructing V-drains in two streets ...	2,720
2. Constructing slaughter-house	740
Total ...	3,460

4. *VIII. Public Works, (a) Supervision.*—The correct provision that has to be entered on account of establishment charges at 10 per cent on the cost of works (exclusive of the provision for compensation) is Rs. 223 and not Rs. 292 as proposed by the President. The former figure will be adopted in the budget.

5. The supplemental budget estimates of the Tarikere Municipality for 1902-03 as now revised will stand thus:—

	Rs.
1. Actual opening balance on 1st July 1902	5,474
2. Estimated receipts for 1902-03	9,150
Total ...	14,624
4. Estimated expenditure for 1903-04	12,268
5. Closing balance	2,356

REVENUE

Proceedings of the Government of His Highness the Maharaja of Mysore,

No. R. 3894-935, DATED BANGALORE, 14TH APRIL 1903.

ORDER.—In exercise of the powers conferred by various provisions of the Revenue Code, the Government of His Highness the Maharaja resolve to issue the following order amending and consolidating the existing orders on the training, the duties, and powers of Assistant Commissioners (in the Revenue Department) :—

Examinations and Training.

2. Every Assistant Commissioner, unless specially exempted, has to pass, before confirmation, the Local Service Revenue, Civil and Criminal Examinations.

3. The Deputy Commissioners should each year in the month of June, so long as Survey operations are in progress, communicate to the Superintendent of Revenue Survey, the names of any Assistant Commissioners of less than seven years' service who have not already been instructed in the principles and pratice of measuring and classification, and the dates from and to which their absence from their ordinary duties can be most conveniently spared; and the Superintendent of Revenue Survey will then name the establishment to which they should be attached, such places being usually selected as are either in or near the districts where they are employed.

4. During the field season, the Assistant Commissioners referred to, unless exempted by Government, should be present with a measuring establishment for about a fortnight and with a classing establishment for about a month; within these periods a fair knowledge of the practical Survey operations should, with ordinary attention, be easily acquired.

5. To connect the field operation with Settlement papers, it is desirable that the Assistant Commissioners in question should attend at the office of a Measuring and of a Classing Assistant for a few days during recess season, and go through the complete papers of one or two villages; two or three days would be sufficient for this, and they would then be entitled to a certificate of general knowledge of the practical part of the Survey operations, which will be granted by the Superintendent of Revenue Survey.

6. An account of the time spent with a Survey Establishment and how it was occupied shall be added to the Assistant Commissioner's Annual Administration Report.

7. Every Assistant Commissioner shall, before the expiry of one year after his appointment and unless exempted by Government, be attached to the Office of the Comptroller for a period of two months for purposes of training, and shall be posted to work in a District Treasury under the general supervision of the Treasury Officer for a further period of two months.

8. Every Assistant Commissioner who has not already received training in a Riding School, should attend the Imperial Lancers' Riding School in Bangalore, when he is stationed there for training in the Comptroller's Office or otherwise.

9. Every Junior Assistant Commissioner shall, whenever convenient, before being placed in independent charge of taluks, be attached as personal assistant for two months, during the touring season, to the Deputy Commissioner or a Senior Assistant Commissioner, to enable him to learn field and jamabandi work.

Divisions and Postings.

10. The taluks in each district will be grouped into Divisions as shown in Appendix I. Neither the head-quarters nor the extent of jurisdiction of the Assistant Commissioner in charge of taluks shall be altered by the Deputy Commissioner without the previous sanction of Government.

11. The Divisions to which the Assistant Commissioners are posted will be notified by Government in the Official Gazette.

Powers under the Land Revenue Code.

12. Assistant Commissioners in charge of taluks shall, subject to the control of the Deputy Commissioner of the District under Chapter XIII of the Land Revenue Code, exercise, within their Divisions, all the powers and perform all the duties of a Deputy Commissioner under the Land Revenue Code and the Rules thereunder, subject to the following modifications :—

(*a*) The power reserved for the Deputy Commissioner in Rule 7 of the Land Revenue Rules about taluk establishments may be delegated by Government to the Assistant Commissioner in charge of the Division in which the taluk is situated. The powers of appointment conferred by Proceedings No. 6306-16—G. 166, dated 16th January 1883, are hereby cancelled.

(*b*) Assistant Commissioners in charge of taluks will confirm or set aside sales of land in their Divisions where the sale proceeds do not exceed Rs. 500. All other sales shall be submitted for the orders of the Deputy Commissioner.

13. Assistant Commissioners in charge of taluks are empowered to grant advances for agricultural purposes not exceeding Rs. 100 in each case.

Para II of Notification No. 2557, dated 10th December 1901.

Touring and Inspection.

14. Assistant Commissioners in charge of taluks shall reside in the headquarters fixed for their Divisions and shall not leave their Divisions without the permission of the Deputy Commissioner. They should tour in the taluks of their Divisions not less than seven months in the calendar year; and during that time, they should visit every taluk in their charge.

15. Government consider it necessary to lay stress on the importance and usefulness of slow marches, in the course of which alone, proper inspections can be made and the local requirements advantageously studied.

Government Proceedings No. 3867-74—F. 920, dated 27th March 1900.

16. Assistant Commissioners in charge of taluks are expected to be good and active horsemen, and should perform their inspections on horse back or on foot or in an open carriage. They should always carry their tents with them in their tours.

17. On or before the 5th of every month Assistant Commissioners in charge of taluks should submit their diaries in the form appended (Appendix II) to the Deputy Commissioner, who will submit them to the Revenue Commissioner with his remarks. This supersedes the present rules regarding the submission of quarterly tour statements.

18. The Assistant Commissioners shall in course of their tours be expected to pay particular attention to the following matters :—

(*a*) The inspection of Taluk Treasuries.

Government Proceedings No. 8547-55—E. F. 213-92, dated 14th December 1892.

(*b*) Inspection of Sub Registrars' Offices.

(*c*) The inspection of Taluk Offices (including the taluk accounts and records).

(*d*) The inspection of Agricultural Banks.

Government Proceedings No. E. 2538-65, dated 10th December 1901.

(*e*) The inspection of boundary marks under Rule 85 of the Land Revenue Rules and of frontier boundary marks in frontier taluks.

Government Proceedings No. 9516-71—E. 3113, dated 1st April 1898.

(*f*) The examination of village accounts, raiyats' receipt books and the register of births and deaths.

(*g*) The inspection of tanks and other irrigation works.

Notification No. 65, dated 2nd October 1873.

(*h*) The inspection of alienated villages brought under Government management under Section 165 of the Land Revenue Code or otherwise.

(*i*) The inspection of lands improved with the aid of loans from Government.

Correspondence between the Amildar and the Deputy Commissioner.

19. Except in regard to matters relating to the Treasury and the preparation of periodical reports and returns, all correspondence relating to Land Revenue matters between the Deputy Commissioner and the Amildar shall, as a rule, pass through the Assistant Commissioner in charge of the taluk. Cases of emergency will also be excepted, copies of communications in such cases being forthwith forwarded to the Assistant Commissioner for information. The tour statements of Amildars, within the Division, will be forwarded to the Deputy Commissioner through the Assistant Commissioner.

Jamabandi.

20. Assistant Commissioners in charge of taluks should conduct the jamabandi of their own taluks with the exception of such as may be reserved by the Deputy Commissioner for himself. The instructions for conducting jamabandi are given in Proceedings No. 3231-8—R. 1053, dated 17th October 1900. Every Assistant Commissioner should at the time of doing jamabandi or examining the records, etc., keep in his own hand notes of the results and the statistics necessary for his report. All such notes should be handed over on a transfer, and the fact that this has been done should be mentioned in the usual report of giving over and receiving charge.

Miscellaneous.

21. (i) Assistant Commissioners in charge of taluks shall be responsible for the issue of timely orders to the Amildars for collection of revenue and for the punctual submission of all periodical returns to the District and shall submit progress reports of revenue collections of their Divisions to the Deputy Commissioner.

(ii) Assistant Commissioners in charge of taluks should keep the Deputy Commissioner informed of all matters of importance in their Divisions.

Annual Reports.

22. Assistant Commissioners in charge of taluks shall, on or before the 1st of September of every year, submit an annual report of their work in the form appended (Appendix III). This report should be a record mostly of work done by themselves throughout the year, of which they should keep a regular Memorandum and not of work done by the Amildars, discrepancies in figures, if any, being rectified in the office of the Deputy Commissioner or the Revenue Commissioner.

The Annual Report for the year 1901-02, submitted by the Agricultural Chemist to the Government of Mysore with his letter No. 154, dated 20th September 1902.

No. R. 3884-5, DATED BANGALORE, 14TH APRIL 1903.

ORDER THEREON.—The report has been read with interest. It is a matter of gratification that the Agricultural Chemist's devoted efforts to construct and equip the laboratory are generally recognised to have resulted in conspicuous success.

2. As a brief record of the year's work, the report might perhaps have been compressed with advantage. The form to be adopted for future reports and the nature of the information to be included in them are under the consideration of Government.

3. The report contains much that is of interest to planters and cultivators. It will accordingly be published in the Gazette, with a translation in Kannada, and in bulletin form for general information, the Agricultural Chemist taking needful action in the matter.

2. *Land Revenue.*—The total estimated "Land Revenue" for the State shows a decrease of Rs. 28,941 as compared with the actual demand for the year 1901-02.

3. The following are the taluks in which the largest decrease is shown :—

Taluks.	Amount of decrease.
Holalkere	36,568
Chiknayakanhalli	16,729
Mysore	14,302
Kadur	11,305
Srinivaspur	6,211
Sidlaghatta	5,277

4. In the Holalkere, Chiknayakanhalli and Kadur Taluks, the decrease is attributed to the constitution of the new Hosdurga Taluk to which some of the villages were transferred, while in the Mysore Taluk, the fall is reported to be due to decrease of water-rate, etc., of Inam Kuppagal village, which had been included in the demand of the year 1901-02. The Deputy Commissioner of Kolar explains that the decreases of Rs. 6,211 and Rs. 5,277 in the Srinivaspur and Sidlaghatta Taluks, respectively, are owing to resignation of lands.

5. *Forest.*—Under this head, there is a net increase of Rs. 7,036, notwithstanding the heavy falling off of Rs. 59,251 and Rs. 31,240 in the Shimoga and Bangalore Districts, respectively. The Deputy Commissioners of Bangalore and Shimoga report that the decrease is due to fall in the realizations under sandalwood and timber.

6. *Abkari.*—Heavy decrease is noticeable in the Districts of Chitaldrug (Rs. 16,103) and Tumkur (Rs. 13,254), the chief contributory cause being want of proper bids and fall in shop rent.

7. *Sayer.*—The figures under this head show a decrease of Rs. 4,683, the Districts of Tumkur and Kolar chiefly contributing to it. The fall is reported to be due to smaller export of supari and failure of crop.

8. *Salt.*—The net decrease of Rs. 4,601 under this head is reported to be mainly due to reduction in salt pans.

9. *Miscellaneous.*—The figures under this head also show a decrease of Rs. 17,908 chiefly in the Bangalore, Kadur and Kolar Districts and is reported to be due to a falling off in the value of building sites and in general stamps, school fees, etc.

10. The statement annexed gives *talukwar* details with reasons for important fluctuations.

KADUR DISTRICT.

Statement showing the Talukwar Estimated Jamabandi under the several heads of Revenue of the Kadur District for the year 1902-03, as compared with the actual Jamabandi for the preceding year 1901-02.

Taluks	Items	Estimated jamabandi for the year 1902-03	Actual jamabandi for the year 1901-02	Difference		Remarks
				Increase	Decrease	
		Rs.	Rs.	Rs.	Rs.	
Tarikere	Imperial Revenue—					
	Land Revenue ...	1,39,981	1,41,781	.....	1,800	The decrease is due to some lands being bought in by Government for arrears of kandayam and also to rajinamas.
	Forest	16,500	14,907	1,593	.....	The increase is due to good bids for timber.
	Abkari	40,000	42,380	.....	2,380	The decrease is due partly to small bids for toddy and partly to the prevalence of plague.
	Mohatarfa	2,000	2,096	.....	96	Due to desertion of some of the inhabitants owing to plague in many villages.
	Sayer	14,000	13,497	503	.....	Due to export of supari kept in stock last year.
	Salt	65	65	.....	.....	
	Miscellaneous ...	8,174	8,363	.....	189	This is fluctuating item.
	Total ...	2,21,623	2,23,992	2,096	4,465	Net decrease Rs. 2,369.
Koppa	Imperial Revenue—					
	Land Revenue ...	1,83,715	1,85,140	.....	1,425	Due to some lands being bought in by Government for arrears of kandayam and also to rajinamas. It is also due to a very few applications for coffee lands.
	Forest	1,508	1,207	301	.....	Due to good bids for soapnut.
	Abkari	38,220	40,713	.....	2,493	Due to less bids for arrack and bagani toddy.
	Mohatarfa	1,940	1,872	68	.....	Due to levy of taxes.
	Sayer	65,021	64,796	225	.....	Owing to good crop.

	Miscellaneous ...	26,383	25,397	986	.....	Increase under stamp and registration etc.,
	Total ...	3,16,877	3,19,125	1,070	3,918	Net decrease Rs. 2,248.
Chikmagalur	Imperial Revenue—					
	Land Revenue ...	2,16,104	2,15,313	791	.....	Due to new lands being taken up by darkhast.
	Forest	4,000	21,209	.....	17,209	Last year the sale proceeds of sandalwood and timber were credited to the Taluk Treasury and brought on to the taluk jamabandi. These items are omitted this year as they are shown against the District head. Hence the decrease.
	Abkari	82,000	81,277	723	.....	Due to favorable bids for date toddy.
	Mohatarfa	2,521	2,520	1	.....	
	Sayer	91	90	1	.....	
	Salt	.....	.....	.....	.....	
	Miscellaneous ...	24,292	23,054	1,238	.....	The increase is chiefly due to sale of court-fees stamps by licensed vendors who purchase them in the Taluk Treasury owing to the abolition of the office of the District salaried vendor.
	Total ...	3,29,008	3,43,463	2,754	17,209	Net decrease Rs. 14,455.

(1) Government Order No. 5719-21—R. 1950, dated 4th February 1901, sanctioning to Mr. J. Partridge, under the Land Improvement Loans Regulation, IV of 1890, a loan of Rs. 7,000 (including the loan of Rs. 2,800 sanctioned in Government Order No. 7388-9—R. 2457, dated 16th April 1900) repayable in 20 equal instalments with interest at 5 per cent per annum, for the improvement of his lands and also for carrying on the silk industry in the kayamgutta Govindapur village, Bangalore Taluk, on the security of the said village.

(2) Government Order No. R. 2493-4—R. F. 5-1901, dated 2nd December 1903, refusing to grant an additional loan of Rs. 8,000 applied for by Mr. Partridge, for (1) manuring, digging etc., his lands, (2) purchasing bullocks, and (3) constructing additional buildings in his estate, kayamgutta Govindapur village.

READ—

Letters dated 8th December 1902 and 8th February 1903 respectively, from Mr. Partridge representing his inability to conduct the silk industry for want of funds and requesting that the loan of Rs. 8,000 applied for may be sanctioned for the purpose of (1) thoroughly cultivating his lands; (2) erecting suitable rearing and examining houses, and (3) erecting servants' quarters.

No. Fl. 1776-9, DATED BANGALORE, 23RD APRIL 1903.

ORDER THEREON.—The purposes for which the loan of Rs. 8,000 is applied for by Mr. Partridge are not defined as agricultural in the Land Improvement Loans Regulation. But sericulture as practised in Mysore is eminently an agricultural business. Under the power vested in them by clause *(f)*, para 2 of Section 4 of the said Regulation, Government are pleased to declare that the term "improvement" shall, for the purposes of the said Regulation, include "cultivation of mulberry for sericulture and erection of buildings in connection therewith." Steps will be taken to amend the rules, if necessary, on this point.

2. The loan of Rs. 8,000 applied for by Mr. Partridge is sanctioned. The amount will be repayable in 20 equal annual instalments with interest at 5 per cent per annum. His estate, *viz.*, kayamgutta Govindapur village will be held as security for this loan also. Further the two loans of Rs. 8,000 and Rs. 7,000 respectively, advanced by Government to Mr. Partridge, will be the first charge on the price that Mr. Partridge may receive, should he be successful in selling the concern to a company. Government shall also be at liberty to depute a limited number of persons to study Mr. Partridge's methods of rearing the worms from time to time, without further payment to him; and this should be made a condition of the grant of the loan.

3. The loan of Rs. 8,000 now sanctioned will be advanced to Mr. Partridge in such sums as the Deputy Commissioner deems proper, having regard to the provision contained in Rule 22 of the Rules under the Land Improvement Loans Regulation.

The Deputy Commissioner is requested to have the necessary documents executed in due form as required by the rules.

H. V. NANJUNDAYYA,
Secy. to Govt., Gen. & Rev. Depts.

To—The Revenue Commissioner in Mysore.
The Comptroller to the Government of Mysore.
The Deputy Commissioner, Bangalore District.

EXCISE

Proceedings of the Government of His Highness the Maharaja of Mysore,

READ—

Letter No. 4334—211, dated 20—29th January 1903, from the Excise Commissioner in Mysore, submitting the record of enquiry relating to the toddy revenue of Pommadevarahalli Inam village, Koratagere Sub-Taluk, Tumkur District.

No. 500-01—Ex. F. 11-01, DATED BANGALORE, 2ND APRIL 1903.

ORDER THEREON.—There is no toddy shop in the village, but there are a few date trees. The Inamdars are not admittedly entitled to the Excise revenue from toddy, either under the sannad or by usage. They claim only the tree-rent and the claim is allowed. The sum of Rs. 27-1-9 reported to have been paid to the Inamdars in excess of what was actually due to them for the years 1892-93 to 1896-97, should be recovered from them and the fact reported to Government.

Letter No. 4333—210, dated 20—29th January 1903, from the Excise Commissioner in Mysore, submitting the record of enquiry relating to the toddy revenue of the Kayamgutta Srinivasapura village, Maddagiri Taluk, Tumkur District.

No. 502-3—Ex. F. 11-01, DATED BANGALORE, 2ND APRIL 1903.

ORDER THEREON.—There is no toddy shop but there exists a small grove in this village. The Inamdar is not admittedly entitled to the Excise revenue from toddy but claims only the tree-rent, which the Government are pleased to allow. He will therefore be paid 1/5th of the rent from the "grove farm" from 1892-93 to 1896-97 under Rule 4 of the Rules issued on 2nd August 1901.

Letter No. 4345—218, dated 20—30th January 1903, from the Excise Commissioner in Mysore, submitting the record of enquiry relating to the toddy revenue of Kayamgutta Somenahalli village, Koratagere Sub-Taluk, Tumkur District.

No. 530-1—Ex. F. 11-01, DATED BANGALORE, 16TH APRIL 1903.

ORDER THEREON.—The village has a date grove but not a shop. The inamdar is not entitled to the Excise revenue from toddy either by the Sannad or under the Inam Settlement. He will, therefore, be allowed only the tree rent. The sum of Rs. 82-6-10 paid in excess of what was actually due to the inamdar, must soon be recovered and the fact reported to Government.

No. 532-3—Ex. F. 11-01, DATED BANGALORE, 16TH APRIL 1903.

ORDER THEREON.—There is no toddy shop in this village, but there is a grove in it. The Inamdars are not entitled to the Excise revenue from toddy, which has not been conceded to them either by Sannad or by the Inam Settlement. Tree rent alone will, therefore, be allowed to them.

2. A sum of Rs. 72-8-0 is reported to have been advanced to them, while they were entitled to only Rs. 16-5-7 for the years 1892-93 to 1896-97 under paragraph 4 of the rules issued with Government Order No. 2074-83—R. F. 166-92, dated 2nd August 1901. Steps should at once be taken to recover the amount paid in excess, *viz.*, Rs. 56-2-5, and the result reported to Government.

No. 534-5—Ex. F. 11-01, DATED BANGALORE, 16TH APRIL 1903.

ORDER THEREON.—There is a date grove but no shop in this village. The Inamdars are admittedly not entitled to the Excise revenue from toddy nor has the Inam Department recognised the right. Government therefore decide that tree rent is all that can be allowed to the Inamdars.

2. A sum of Rs. 337-1-7 is said to have been advanced to the Inamdars, while they were entitled to only Rs. 92-11-2 for the years 1892-93 to 1896-97 under Rule 4 of the rules issued in August 1901. Steps should soon be taken to recover the amount paid in excess and the result reported to Government.

Letter No. 4337—214, dated 20—29th January 1903, from the Excise Commissioner in Mysore, submitting the record of enquiry relating to the toddy revenue of the Jodi Garani village, Maddagiri Taluk, Tumkur District.

No. 538-9—Ex. F. 11-01, DATED BANGALORE, 16TH APRIL 1903.

ORDER THEREON.—The Nirup issued to the Amildar of the Maddagiri Taluk in 1806 and the Inam settlement have recognised the Inamdars' right to all theitems of toddy revenue. The several officers who investigated the claim in 1894 and in 1902 are satisfied that it is fully established. There is a shop and a grove in this village. Under these circumstances Government are of opinion that the Inamdars are entitled both to the Excise revenue from toddy and the rental of the shop under the various systems from the year 1892-93 under Rules 2, 3, 5, 6, 9, 10 and 11 of the Rules contained in Government Order No. 2074-83—R. F. 166-92, dated 2nd August 1901.

Letter No. 4335—212, dated 20—29th January 1903, from the Excise Commissioner in Mysore, submitting the record of enquiry relating to the toddy revenue of the Kayamgutta Chinchenahalli village, Koratagere Sub-Taluk, Tumkur District.

No. 540-1—Ex. F. 11-01, DATED BANGALORE, 16TH APRIL 1903.

ORDER THEREON.—Only a few trees are said to exist in this village which is without a shop. The Inamdars admit that they are not entitled to the Excise revenue from toddy, but claim the tree-rent, which the Government are pleased to allow them. The sum of Rs. 8-12-6 paid in excess of what was actually due to the Inamdars should be recovered and the fact reported to Government.

PETITION

Proceedings of the Government of His Highness the Maharaja of Mysore,

READ—

Petition No. 1833 of 95-96, from Ramachar and other holders of lands under Salur anikat and channels, Shikarpur Taluk, complaining of the increase of assessment on their lands.

2. Correspondence ending with letter No. 546—414, dated 13th December 1902, reporting on the above.

The facts of the case are as follow :—

In 1889 the Salur anikat in Shikarpur Taluk which had been in disrepair was repaired and in 1894-95 the lands under the anikat and channels were re-classified and their assessment revised. In November 1895 certain holders of lands under the anikat and channels complained to Government of the increase of assessment on their lands and represented that the supply of water was not increased by the repair of the anikat. The Deputy Commissioner (Mr. A. Rangaswamiengar), to whom the petition was referred, reported in his letter No. 572—486, dated 24th November 1896, that the complaint was well founded in the case of 135 acres and 35 guntas of lands which could not be irrigated from the channels and the assessment of which had to be reduced and that he would submit a further report regarding the full extent of lands not irrigable by the channels but yet assessed at wet rates after having the levels taken by a Public Works Department Officer.

2. In his docket No. 1290—1064, dated 12th May 1898, the Officiating Deputy Commissioner (Mr. H. V. Nanjundayya) reported that the Executive Engineer was regrading the channels and fixing Mangalore-pipe sluices to avoid further complaints concerning water-supply to the lands below the channels and that he would report the result on the completion of the work. In his letter No. 814—690, dated 4th March 1902, the Deputy Commissioner (Mr. K. P. Puttanna Chetty) submitted to Government copies of the reports of the 2nd Assistant Commissioner and the Executive Engineer and requested that the repairs and improvements to the anikat and channels suggested in the aforesaid reports be carried out; that a maregar on Rs. 10 be appointed to distribute the water in the channels and that the sanction of Government be accorded to the remission of assessment on certain lands under the channels which were not cultivated either owing to defective water-supply, or to a breach in the channels. The repairs and improvements to the channels suggested by the Deputy Commissioner have been commended to the attention of the Chief Engineer in Mysore.

3. In his letter No. 291—220, dated 24th September 1902, the Deputy Commissioner submitted three statements showing the remissions of assessment recommended by him for certain lands under the anikat and channels and stated that the remission in the case of some of the lands was necessitated by the revision of the akarband of Salur village in June 1900 by the Superintendent of Revenue Survey. He further requested the early orders of Government on the reduction of assessment on 135 acres and 35 guntas of lands recommended in Deputy Commissioner's letter dated 24th November 1896. In his letter No. 546—414, dated 13th December 1902, the Deputy Commissioner states that the further report promised in the letter dated 24th November 1896, was submitted in the docket dated 12th May 1898, and that the revision of the akarband in June 1900 extended only to a portion of 135 acres and 35 guntas referred to above.

No. 1380-82—P. F. 49-02, DATED BANGALORE, 1ST APRIL 1903.

ORDER THEREON.—The Government observe that the re-classification and assessment of the lands by the Survey Department have not been attended with any satisfactory results. The construction of the distributary channels by the Public Works Department has been unsatisfactory. Lands which were not irrigable were classed as irrigable, the channels were not properly graded and more lands than could be properly irrigated were brought under cultivation and the result has been a large number of complaints. The Government note from the report of the Assistant Commissioner, dated 28th June 1902, that the experiment of fixing Mangalore-pipe sluices has not been a success. The Chief Engineer whose attention has already been drawn in this office letter No. Pet.—1884, dated 3rd April 1902, will be requested to place the anikat and channels on an efficient footing and prevent further complaints.

2. The Deputy Commissioner's reports show that in June 1900 the Superintendent of Revenue Survey revised the akarband of Salur village on the complaints of some of the holders of lands and in accordance with the direction of Government conveyed in Government Order No. C. 7, dated 15th December 1883, and docket No. 1925—9, dated 2nd May 1892. But they observe that a report was not made and sanction of Government obtained for the revision of assessment as required by the provisions of the Revenue Code.

3. The Government regret to observe the long intervals between the dates of the Deputy Commissioner's several reports in the matter. A further and fuller report was promised by the Deputy Commissioner in 1896, but none has been received till now, except an *ad interim* report in 1898. Government cannot accept this as sufficient and regret to observe that prompt action was not taken by the Revenue and Public Works Department Officers concerned to bring the matter to a final settlement.

4. The Government sanction as a special case the remissions to the extent of Rs. 3,821-11-7 recommended by the Deputy Commissioner and direct the recovery of the balance in convenient instalments. The remissions now sanctioned are but acts of bare justice necessitated by the anikat and channels not working properly, by the lands not having been properly classified and assessed, and by the breaches in the channels not having been attended to promptly. These reliefs will have to be continued indefinitely unless prompt measures are taken to remedy them. The attention of the Deputy Commissioner and the Chief Engineer is again drawn to the necessity of improving the facilities of irrigation.

5. The appointment of a manegar for the anikat and channels on a monthly pay of Rs. 10 is sanctioned with effect from 1903-04. The Deputy Commissioner is requested to make due provisions in the budget for that year.

6. The Government are glad to find that the interesting report of Mr. C. S. Balasundaram Iyer, Assistant Commissioner, indicates an intelligent and thorough comprehension of the whole subject and is creditable to this young officer.

Secy. to Govt., Gen. & Rev. Depts.

FOREST

Proceedings of the Government of His Highness the Maharaja of Mysore,

READ—

(1) Government Proceedings No. 1601-3—Ft. F. 38-95, dated the 7th August 1897, sanctioning the alienation of certain lands taken up for the Manchaldore State Forest in the Tumkur District, and directing the publication of a notification defining its boundaries.

(2) Correspondence ending with docket No. 122—9, dated the 20th October 1900, from the District Forest Officer, Tumkur, through the Deputy Commissioner, submitting the settlement register, revised boundary statement and sketches relating to the forest in question.

(3) Note dated 11th January 1903, by the Officiating Conservator of Forests and Secretary to Government in the Forest Department, recommending, for reasons stated, the inclusion of an additional area of 196 acres and 28 guntas into the forest, and the re-publication of the boundaries with more details than what contained in the original notification of 1897.

No. 607-8—6106-7, DATED BANGALORE, 3RD APRIL 1903.

ORDER THEREON.—As recommended by the Officiating Conservator, the additional area referred to above will be included in the Manchaldore State Forest and the revised boundaries will be published in the *Mysore Gazette* as hereunder.

2. The Forest, as now reported, will consist of 15 square miles, 543 acres and 28 guntas comprising the survey numbers as detailed in the annexed statement.

3. Survey No. 16 and portion of No. 18 of Geddalahalli having been included in the State Forest, so much of para 2 of Proceedings No. 1601-3 read in the preamble as relates to the allotment of these numbers as gomal for the raiyats of Manchaldore village is cancelled.

4. Government note that no extra cost will be incurred by the Department in re-demarcating the line on the Manchaldore side of the Forest and that the boundary line will be carefully demarcated in accordance with the alienation statement now sanctioned.

M. MUTHANNAH,
Offg. Secy. to Govt., Forest Dept.

To—The Deputy Commissioner, Tumkur District, returning the sketches and original records.

No. 645-9—6485-9, DATED BANGALORE, 23rd APRIL 1903.

ORDER THEREON.—The Government have given the question their best consideration, and are of opinion that the Order of 24th August 1901 should be rescinded. They have come to the conclusion that the levy of seigniorage on head-loads of firewood removed from District Forests is as harassing to the people as it is unproductive of any large revenue to Government. The levy under advertence is accordingly abolished. The following Notification will be published in the *Mysore Gazette* for general information.

(1) Letter No. 336, dated the 20th December 1902, from the Deputy Commissioner, Chitaldrug District, soliciting orders in the matter of appeals against the decisions of Forest Officers empowered to compound forest offences under Section 59 of the Mysore Forest Regulation.

(2) Note dated the 23rd January 1903, by the Officiating Conservator of Forests and Secretary to Government, Forest Department, submitting his views.

No. 653-60—6507-14, DATED BANGALORE, 24TH APRIL 1903.

ORDER THEREON.—There are two questions involved in this reference. They are (1) whether the order of the compounding officer is subject to appeal to or revision by his official superior, and (2) whether the amount of compensation can be recovered as an arrear of revenue demand.

2. To the latter question Government have no hesitation in saying that the reply must be in the negative. Payment is a condition precedent to composition. No question of the mode of levy therefore arises. To the former question, too, the reply is in the negative, the object being to secure finality in orders passed in such cases.

Note, dated 13th September 1902, by the Officiating Conservator of Forests and Secretary to Government, Forest Department, submitting for approval the draft of a circular regarding Forest offences.

No. 661-8—6537-44, DATED BANGALORE, 24TH APRIL 1903.

ORDER THEREON.—In continuation of Proceedings No. 751-8—Ft. F. 15-1900, dated the 14th May 1901, Government are pleased to prescribe the following procedure to be followed in forest cases :—

1. On the day on which the commission of a forest offence becomes known to or is detected by the guard or other forest subordinate in charge of a beat, he will report the fact to the Forest Range Officer after obtaining, if possible, the village patel's countersignature to his report and will also forward the pound receipt, if there is one. The Range Officer will be held responsible for seeing that no delay occurs on the part of his subordinates in making the report.

2. On receipt of this report, the Range Officer will, *with as little delay as possible*, satisfy himself as to the truth or otherwise of the case, either from the report of the subordinate or after further investigation by himself and sumbit an offence report in Form A to the District Forest Officer. If his investigation occupies more than a week, the Range Officer must within the week submit a preliminary report stating the facts, but in all oridinary cases Form A must be submitted to the District Forest Officer within one week.

Note.—If the Range Officer is invested with the powers described under Section 59 of Forest Regulation, he can himself dispose of the report without reference to the District Forest Officer.

3. Form A which goes to the District Forest Officer must be accompanied with all available information and records, if any, of the investigation.

4. On receipt of the report in Form A, the District Forest Officer will pass his orders thereon and communicate his decision to the Range Officer in Form B. If the orders are to compound a copy of the proceedings setting forth the circumstances and the amount of compensation payable will be furnished to the person paying the compensation and another submitted with the least possible delay to the officer's immediate official superior.

5. (*a*) If the orders are to prosecute, the Range Officer will at once submit a copy of his report in Form A, to the Magistrate having jurisdiction to be dealt with by him according to law.

(*b*) If the orders are to compound, the Range Officer will issue a notice in vernacular to the accused, stating the amount of compensation and the date on which it is to be paid. If within 30 days the composition fees are not paid, a report in Form A will at once be submitted to the Magistrate having jurisdiction in view to the needful action being taken as in clause (*a*) *supra*. Where there are several accused persons and one or more of them have paid the composition fees, the case or cases against the remainder only will be placed before the Magistrate.

(*c*) If the orders are to withdraw the case, the papers will be recorded.

6. Magistrates should be requested to post, as far as possible, several forest cases to the same date so as not to necessitate the frequent absence of Forest Officers from their other duties.

7. As regards offences of a petty nature when the offenders are not known, a formal report in such cases is unnecessary, and for departmental purposes it will be sufficient to mention the fact in the officer's weekly diary.

8. Instructions for using the Forms A and B.

(*a*) In reporting a forest offence to the District Forest Officer or the Magistrate, Form A should be used.

(*b*) Form B will be in duplicate in which the District Forest Officer or other compounding officer communicates orders on the offences reported by the Range Officer in Form A. The duplicate will be sent to the Range Officer who will resubmit it to the District Forest Officer after filling in the required particulars on the reverse. On receipt of this duplicate it will be pasted on to the counterfoil in the District Forest Office and filed.

9. Range Officers will maintain a register in Form C of all cases compounded in their Ranges.

MUZRAI

Proceedings of the Government of His Highness the Maharaja of Mysore,

READ—

Petition No. 213, dated 2nd September 1901, from Kyatanahalli Narasimha Jois of Mysore, appealing against the order of the Palace Controller, in the matter of turns to perform the stanik etc., services in the Sri Lakshmiramanaswami temple at Mysore.

AND—

Letter No. 30, dated 5th November 1901, from the Palace Controller, Mysore, submitting the records connected with the case.

No. 2071, DATED BANGALORE, 4TH APRIL 1903.

ORDER THEREON.—The facts of the case are as follow :—One Kyatanahalli Tirumalachar was the original Baravarddar of the Stanik, Sripada and Jyotisha appointments in the Sri Lakshmiramanaswami temple at Mysore, a Muzrai Institution, under the management of the Palace Controller. On the death of Tirumalachar, the Baravard was made in the name of his second son Srinivasa Jois, the emoluments attached to the offices in question being, however, allowed to be enjoyed equally by the three sons of the deceased. This Srinivasa Jois died about the year 1879, and at the request of the sons of the three brothers alluded to above, the Baravard was changed to the name of Tirumalachar, son of the deceased (Srinivasa Jois). The sons of the three brothers, however, *viz.*, Srinivasa Jois, Tirumalachar and Narasimha Jois, were each allowed to enjoy four months' *hisse* by turns as usual.

2. Matters went on smoothly from 1879 to 1894, when Narasimha Jois (the present appellant) petitioned the Palace Controller, complaining that Srinivasa Jois, (the son of the eldest son of the original Baravarddar) was always officiating during the period of four months in which the car festival came off, and praying that, as it was a period when the officiator's emoluments were highest during the year, each of the three *hissedars* including himself should be allowed to do duty by turns of one year each. The Palace Controller (Mr. V. N. Narasimmiyengar) heard all the parties concerned, and having been satisfied that Srinivasa Jois who is the eldest member of the family, had been for a very long time officiating at the car festival annually, and that, however, the perquisites appertaining to the offices in connection with the festival were being shared equally by the three men concerned, directed in his order No. 76, dated 22nd July 1901, that, in accordance with the existing practice, Srinivasa Jois should continue to officiate during the car feast. The present appeal is against this order.

3. It is clear from the records that since the year 1879 Srinivasa Jois has been officiating during the car festival every year, and it is also admitted that the perquisites attached to the offices are being enjoyed by the three hissedars in *equal* shares. The Government, therefore, see no reason to interfere with the orders of the Palace Controller. The appeal is accordingly rejected.

Correspondence ending with letter No. 1342, dated 31st May 1902, from the Deputy Commissioner, Bangalore District, regarding the restoration of the resumed inam lands attached to the Sri Kasi Visweswaraswami temple at Sulibele, Hoskote Taluk.

AND—

Docket No. 23, dated 23rd September 1902, from the Superintendent of Inam Settlements in Mysore, forwarding the extract of the inam register pertaining to the resumption of the inam lands.

ALSO—

Petition Registered No. 204-302—303, dated 18th October 1902, addressed to His Highness the Maharaja by the archak of the temple praying for the restoration of the resumed inam lands to the temple.

No. 2060-64—MUZ. F. 11-1902, DATED BANGALORE, 4TH APRIL 1903.

ORDER THEREON.—From the records received with the above, it is observed that the marginally noted lands were Devadaya Inams granted to the Sri Kasi Visweswaraswami temple at Sulibele, Hoskote Taluk. During the Inam Settlement in 1877, the lands were resumed to Government on account of the then disrepaired state of the Institution. The temple is reported to have been since repaired and kept in a fairly good order, and worship therein is being properly attended to. The archak and others interested in the temple pray for the restoration to it of the resumed lands. But the Deputy Commissioner reports that the present occupants of the lands who obtained them on kandayam tenure are unwilling to restore them to the temple. The Deputy Commissioner therefore proposes that either the assessment of the resumed lands be given as cash grant to the temple, or lands equivalent to the beriz of those resumed be granted out of Government unoccupied assessed wet and gomal lands. In the latter case, he proposes that out of gomal No. 216, containing 62 acres and 15 guntas, land equivalent to the assessment of Rs. 20, as also the wet Survey No. 233, measuring 2 acres and 10 guntas assessed at Rs. 14 and now lying waste, may be granted in lieu of those resumed. He also reports that the remaining gomal land is sufficient for the cattle in the village and that the villagers have no objection to the proposed grant.

Village.	Survey No.	Extent. A.	Extent. g.	Assessment. Rs.	a.	p.
Sulibele	156 dry	7	13	13	0	0
	264 wet	2	7	14	0	0
Attibele	11 wet	4	16	7	0	0
	Total			34	0	0

2. The Government are inclined to accept the second alternative and are accordingly pleased to sanction the grant to the temple of Survey No. 233 (wet) assessed at Rs. 14 and a portion of the gomal land equivalent to the assessment of Rs. 20 in the Sulibele village. The portion of the gomal land thus granted should be divided into a separate sub-number and this as well as the Survey No. 233, registered as Devadaya Inam in the name of the temple, the necessary alterations being effected in the village accounts. A final report should be submitted for the information of Government.

(1) Petition Registered No. 2049, dated 9th April 1901, from Ramaswamiachar of Hole-Narsipur, complaining against the alienation of the Inam village of Tammagondanahalli endowed to the Sri Uttaradi Matt at Hole-Narsipur.

(2) Letter No. 380, dated 27th November 1902, from the Deputy Commissioner, Tumkur District, reporting on the above.

(3) Docket No. 46, dated 19th December 1902, from the Superintendent of Inam Settlements in Mysore, forwarding a copy of the Inam Settlement Register relating to the grant of the Inam to the Matt.

No. 2093-5—MUZ. F. 10-1895, DATED CAMP MYSORE, 23RD APRIL 1903.

ORDER THEREON.—From the records read above it is observed that the village of Tammagondanahalli in the Koratagere Sub-Taluk, is a Sarvamanyam Inam, granted long ago and confirmed by Dewan Purnaiya in 1801, for the service of Sri Ramadevaru of the Sri Uttaradi Matt at Hole-Narsipur. At the Inam Settlement in 1871, it was confirmed in the name of the "Uttaradi Matt for support of the Matt." In the year Raktakshi (1864-65) the then Swami of the Matt (Satyakama Theertha Sripadangalavaru) made a gift of the village to one Haveri Krishnachar, in exchange for a piece of land in the Gollahalli village, Dodballapur Taluk, and half a vritti in the Chitnahalli village, Krishnarajpete Taluk. Jayaramachar, son of the alienee, has produced a copy of the deed of gift executed by the Swami, authorizing the grantee to enjoy the village in hereditary succession. This gift made in 1864-65 does not appear to have been brought to the notice of the Inam Department as it is stated in the Inam Register that "there were no subsequent alienations" that "the Inam was enjoyed by the High Priest for the time being" and that "the Inam should be confirmed rent free, so long as the service was duly performed." This concealment of facts seems to have prevented the alienation from coming to light till now. The Deputy Commissioner Mr. M. S. Narayana Rao states it as his opinion that the alienation of the Inam village by the Swamigalu was unauthorized, that the estimated value thereof is about Rs. 10,000 while the values of the lands accepted by the Swamigalu in exchange in Gollahalli and Chitnahalli villages are estimated at about Rs. 200 and 6 or 7 hundred respectively; and that therefore there is no comparison between the Inam village and the lands said to have been received in exchange therefor for the Matt.

2. The Government observe that the alienation by gift of this valuable Devadaya Inam village by a previous Swamigalu of the Sri Uttaradi Matt was clearly unwarranted and, having been made unauthorizedly subsequent to 1853, it comes under Clause II B and Rule IV of the Government of India Notification No. 265, dated 17th November 1877. The village should accordingly be resumed unconditionlly.

3. As the Matt gifted away this valuable village without any regard to the object of the grant and to the well-being of the institution, and have shown no inclination up to date to recover it, the Government further direct that, after resuming the village it should be placed under the direct management of the Muzrai Department through the Deputy Amildar of Koratagere, in view to the annual income thereof being kept in the hands of Government for the real benefit of the Matt, as is done with the monthly cash Tasdik of Rs. 526 which has been under attachment for some years past. The Deputy Commissioner of the Tumkur District is requested to take immediate steps as above and report the action taken to Government.

4. From the records of this case it also appears that another Inam village named Gollahalli in the Dodballapur Taluk, belonging to the Sri Uttaradi Matt, has gone into the hands of other parties. The Deputy Commissioner of the Bangalore District is requested to institute enquiries regarding the circumstances of the alienation of this village and report the matter for orders of Government as early as possible.

Proceedings of the Government of His Highness the Maharaja of Mysore,

No. 519-27-S, DATED BANGALORE, 22ND APRIL 1903.

ORDER.—It has come to the notice of Government that the District Magistrate of Tumkur has, in license No. 6 issued by him in Form B of the Explosives Rules for the current calendar year, licensed with other articles the possession and sale of 2,500 lbs. of sulphur and 170 lbs. of shots. This is irregular. As sulphur and shots are not classed as explosives under the Explosives Regulation and Rules, the license therefor should be granted under the Rules under the Mysore Arms Regulation. With regard to this and the licensing of other ammunition and Military stores to those who possess licenses under the Explosives Rules, the District Magistrate's attention is invited to Government Proceedings, Geological, No. 281-90—M. F. 150, dated 15th February 1901, and No. S. 30-39, dated 12th July 1901, and he is now requested to cancel sulphur and shots in the license referred to above (as well as in any other licenses under the Explosives Rules in which they have been included) and to issue fresh licenses for these articles under the Arms Rules.
